KIBAR HOLDING GROUP PROFILE 2014

Founded in 1984, Kibar Holding took its first step in industrialism with Kartal Metal Plate Processing Unit in 1972. It started galvanize production with foundation of Galvanize Production Plants in 1974, which is today called Assan Iron and Steel, and in 1982 as Insurance Agency.

Kibar Foreign Trade which was established in 1985 with the aim to carry out foreign trade activities of the Group, operates in fields of export, import and transit trade of mostly Iron Steel products besides export of the products manufactured by Kibar Group. In addition, Kibar Foreign Trade carries out contract manufacturing of various iron & steel products of which it procures raw materials, and exports them to several countries.

Assan Aluminum which produces and trades flat rolled aluminum (coil, sheet and folio) started its operations in the year 1988, in Tuzla Plants. In 1989, the distributorship of South Korean Hyundai Motor Company was granted; in 1990, Assan Panel Tuzla Plants started its operations to produce polyurethane-filled sandwich panel, monolayer corrugated sheet covering and accessories and supplementary elements.

In 1993, Kibar Insurance Brokerage Services was founded, in the same year ISPAK which was operating in flexible packaging sector was taken over and started its operations as Kibar Holding affiliate.

In 1994, Hyundai Assan Automotive was founded by the partnership of South Korean Hyundai Motor Company and Kibar Holding, and the groundbreaking of Hyundai Assan İzmit Factory was performed on September 25, 1995. Still in 1995, Bareks Foreign Trade was founded to develop relationships with Commonwealth of Independent States.

KIBAR HOLDING CORPORATE PROFILE

In 1996, Assan Hanil Automotive operating in automobile sub-industry sector was founded as the partnership of South Korean company Hanil E-Hwa and Kibar Holding. In the same year, Assan Logistics & Fleet Leasing which is providing door to door logistics and operational fleet leasing service national and international levels today, was founded.

Hyundai Assan İzmit Factory whose groundbreaking was performed in Kocaeli, in 1997 and which was built within a record high time period, engaged in serial production in July. Assan Hanil Automotive Plants whose groundbreaking was performed in February, started their production in September.

In 1998, Assan Gıda was founded with the title Assan Foods to produce paste and ketchup; in 2001, Kibar International was founded in city of Lausanne in Switzerland, to support imports and exports of our companies engaging in international trade.

In 2005, Assan Panel İskenderun Plant was launched; in 2006, Dilovası Plants were taken over and launched as Assan Aluminum Dilovası Plants. Still in 2006, Kibar Holding Information Technologies Department which meets Information Technologies needs of Kibar Holding companies in different sectors, brought a new dimension to their works.

In 2007, Sicpa Assan Product Security Industry was founded to provide technological service and solution packs to enable prevention of unrecorded, counterfeit and contraband products by developing solutions according to need and situation in very important fields, tracking products in supply chain in brand and product security and in distinguishing counterfeit from original. Within the same year, Assan Construction was founded to provide services in every field of the construction sector.

In 2008, Assan Real Estate was founded to handle management of domestic and international real estates, establish investment fields and prepare projects on them.

In 2009, Assan Panel Balıkesir Plants and a year later, Assan Panel Dilovası Metal Dyeing Plants started their operations. Starting out with

contemporary expectations of Turkish society, Kibar Holding successfully put into effect use of environment-friendly pentane gas in sandwich panel production instead of the ozone-depleting freon gas in atmosphere, within the scope of a project implemented with contributions of Tübitak. In 2010, Ege Assan Food was founded for tomato paste export, in the İzmir Free Zone located in İzmir. In the same year, Assan Liman İşletmeleri, the 3rd container port of Turkey and operating in İskenderun, was founded with the title of Assan Port.

In 2011, Posco Assan TST Steel Industry was founded by the partnership of Kibar Holding, Posco and Daewoo International companies, to produce stainless steel with Cold Rolling Technology in Turkey. The groundbreaking of the plant located in İzmit Asım Kibar Organized Industry Zone was performed on September 28, 2011.

In 2011, TSI Aviation Seats was founded to design, produce and repair seats for aircrafts with the equal partnership of Assan Hanil Automotive, Turkish Airlines (THY) and Turkish Technic. Still in 2011, the first production plant abroad of Kibar Holding, Kibar Industry Company was founded in Jordan, for sandwich panel production. In the same year, Kibar Energy Distribution Industry, the first investment of Kibar Holding in energy sector, was founded to import and sell natural gas in the Turkish Energy Market.

On January 26, 2012; groundbreaking of Assan Aluminum Dilovası Dyeing Plants was performed. Kibar Industry Jordan Plants, for which the factory groundbreaking was performed in April of the same year, started its operations in December. On August 8, 2012; groundbreaking of Assan Hanil Dyeing Plant in İzmit was performed.

On May 3, 2013; Assan Aluminum Dilovası Dyeing Plants started their operations with the first coil coming out of the Assan dyeing line during the ceremony for starting hot tests. In the same year, on July; Assan Hanil Dyeing Plant launched its operations; on August 15, Posco Assan TST started production and the shares of Assan Port Operator were transferred to United Investment Limited and Galata Port.

ASSAN HANIL AUTOMOTIVE & TRADE INC.

Assan Hanil was established in 1996 with partnership between Kibar Holding and South Korea automotive sub-industry company Hanil E-Hwa. It has started production as a sub-industry player in the automotive industry as of 1997.

Although it was providing parts only for Hyundai Assan in the first years of its establishment, it became one of the most important providers of Ford - Otosan in 2005.

Assan Hanil produces driver and passenger seats, door panels, ceiling and carpet covering, rear parcel shelf, front and rear bumpers, pre control panels, inflation parts, compartment etc. at its 30.000 m² factory in Kocaeli with approximately 770 dynamic staff.

In 2013, "Plastic Injection and Painting Plant" was opened within the Asım Kibar Organized Industry Zone. Yearly 2.400.000 external trim parts are planned to be produced in the plant having 13.000 m² closed area.

Having ISO/TS 16949, ISO 14001, 2011 OHSAS 18001, Q1 and 5 Star Quality System Certificates and also IRIS (International Railway Industry Standards), Assan Hanil took another important step and created its R&D center

approved by T.R. Ministry of Science, Industry and Technology in order to increase service quality provided to its customers and increase the scale of transportation industry. It became one of the few companies that was granted this support. Assan Hanil opened R&D Design Office in Bursa Uludağ University Campus in 2011. It was required for a strategic decision.

Assan Hanil Automotive and Turkish Airlines and THY Teknik A.Ş. agreed to produce aircraft seats together in Turkey. Joint Venture Company established under the name "Turkish Seat Industry and Trade Inc." (TSI) shall perform aircraft seat design, production, logistics support, maintenance, repair and modification and sale and marketing. Products shall be the first final products to be placed to commercial aircrafts in Turkey. Assan Hanil undertook internal and external trim parts production of M2 class minibus to be produced by Karsan and HMC (Hyundai Motor Company). Assan Hanil Bursa Demirtaş Organized Industrial Zone Production Plant having 9000 m² closed area shall be opened as of March 2014 for this objective.

ASSAN PANEL INDUSTRY AND TRADE INC.

Starting its operations in 1990, Assan Panel Industry and Trade Inc. made its first factory investment with 4.000.000 m²/year sandwich panel capacity in Tuzla, İstanbul. It increased its total physical installed capacity to 10.000.000 m²/year through 3 local production facilities in İstanbul, Balıkesir, and İskenderun. Assan Panel reached 85% record capacity usage ratio which is rare for Turkey and the World with its sales from 8.500.000 m² production since 2010.

It contributes to construction of sustainable building by using polyurethane, PIR (polyisocyanurate), rock wool insulation materials in its products with environmental friendly production understanding at high security standards.

Making Assan Panel Painting plants investment in 2010, it started high quality painted metal production with Coil coating / Rolled Painting

technology.

In addition to producing quality, safe, fireproof products, Assan Panel also focused on the application of its products. It has successfully created a national and international competent and professional franchise network and brought quality service understanding of us beyond our borders.

Directing its industry with its quality understanding, Assan Panel has registered its quality understanding including production, sale, after sale services with ISO 9001:2008 certification in 2006.

Getting TS EN 14509/AC: 2009-TSE certificate in 2009, it has secured all its quality control processes including raw material, production processes, and shipment.

As a natural result of its interest in sustainability approach and environmental sensitiveness, it has been granted ISO 14001 environmental

management system certificate in 2012. Assan Panel quality understanding was also internationally registered with Gost-Rusya and Ukr-Sepro/Ukraine quality certificates. Being one of the most preferred brands of the sandwich panel market and aiming to provide added value in Turkey, Assan Panel exports to

42 countries including France, Germany, The Netherlands, England, Bulgaria, Romania, Russia, Ukraine, Georgia, Azerbaijan, Greece, Iraq, Libya, Algeria, Kazakhstan, Turkmenistan, United Arab Emirates, Saudi Arabia, Jordan, Syria, Moldova, Macedonia, Croatia, Kosovo, Egypt, Iran, Tajikistan, Ethiopia, and Sudan.

HYUNDAI ASSAN AUTOMOTIVE INDUSTRY AND TRADE INC.

Turkish consumers first met the Hyundai brand in 1989 when Kibar Holding became its Turkish distributor. Hyundai decided to establish its first overseas production center in Turkey considering the high potential of Turkish market where it had quite an important success in a very short time and Turkey's geographical closeness to Europe.

Started to be constructed in İzmit on September 25, 1995 and completed in a record short time and starting serial production in July, 1997, Hyundai Assan Factory was opened with a ceremony held on September 20, 1997. Factory consists of 1-million m² area in Ali Kahya District of İzmit and 233.000-m² factory site and 108.000 m² closed area.

Established with a 180 million USD investment at first stage, the factory now has 200.000 unit production capacity. Hyundai Assan İzmit Factory is very important as the door of Hyundai Motor Company opening to Europe with its new i10 model in Segment A and i20 model in Segment B produced by Turkish labor and exported to the whole region; mainly to the European countries. Producing over 850.000 vehicles until today, Hyundai Assan Factory produces 36 vehicles per hour on average and daily total production is approximately 520 vehicles.

Applying ISO 9001 Quality Management System and ISO 14001 Environmental Management System, Hyundai Assan Factory's products i10 and i20s have highest production quality like global production centers.

Upon a declaration on May, 2012, the yearly production capacity of Hyundai Assan İzmit Factory was increased to 200.000 with a new investment. Hyundai Assan included production of i10 model at the end of 2013 with a 382

million USD investment. Hyundai's New Segment A model the i10 started to be produced on September 26, 2013 and is exported to all over Europe. Hyundai Assan employed additional 750 people for the factory with this investment. Thanks to this investment reaching to 607 million USD all together with sub-industry producers, new employment opportunities were created for almost 2.400 people in the region. Hyundai Assan Factory became an even more important production center with its Segment A and B vehicles.

Relying on its quality and products, Hyundai is the first and only brand providing 5 Years Producer Company Mechanical Guarantee for all its vehicles in Turkey. Moreover, Hyundai is the first and only brand whose the authorized sellers throughout Turkey having ISO 9001 Quality Certificate.

Hyundai has in total 71 authorized resellers and 83 authorized servicing centers spread over more than 50 provinces throughout Turkey. Being the 5th company in Turkish Automotive Industry, Hyundai is also aiming to be the brand providing best service and highest customer satisfaction in Turkey and the entire world. Hyundai continues to improve through both its title "World's Most Developed Automotive Brand" granted in the last two years and important awards granted for its brand and products within the direction of "New Thinking. New Possibilities" and "Modern Premium" philosophy. Hyundai enables the whole world to benefit from its production and high quality and reliable products and it prioritizes customer satisfaction and environmental protection and aims to provide a better future both for Hyundai and its customers.

TSI AVIATION SEATS INDUSTRY AND TRADE INC.

TSI is a joint venture company founded in the year 2012 by the equal partnership of THY and Assan Hanil, to produce the first domestic aviation seat in Turkey, with its slogan "We Thought Globally We Produced Locally".

The founding purpose of TSI is to design, produce, repair and sell all kinds of aircrafts and to provide the spare part support concerning the related parts. Focusing on the issue of weight, which is very important in the aviation sector and has a direct impact on fuel consumption, and by designing quality, light and innovative products on competitive prices; it aims at grabbing a large slice of the world civil aviation market with a very high added value. TSI has a production line with an annual seat capacity of 10,000 pax; thanks to its experience rooted in the automobile sector and its lean production capability, it is capable of enlarging this capacity in a short time.

TSI is able to run the static tests and qualification tests within its own body. Dynamic tests and combustion tests are run at the approved test centers abroad.

TSI provides the optimal benefit in key features such as price, living space, weight according to customer demands. TSI aims to create advantages in favor of the customer during the quality and supply term, by reflecting its automobile experience to the sector.

The seats produced via cutting-edge technology and whose automation and software are created in Turkey; are manufactured within the shortest time, thanks to the first-in-the-world automation system, a 100% domestic engineering marvel. And this means an advantage of faster delivery by 50%. Along with all these features, TSI also offers a worldwide valid quality assurance with its certificates of approval DOA, POA and ETSO granted by the European Aviation Safety Agency EASA.

TSI is the first and single organization to have the certificates on Design Approval (ADOA), Production Approval (POA) and type approval for its products (ETSO), granted by EASA.

ASSAN REAL ESTATE DEVELOPMENT & INVESTMENT INC.

Established in 1991, Assan Real Estate Development & Investment Inc. focuses on determining new investment areas and purchasing; conducting legislation and plan studies in order to realize investment; following legal process; completing feasibility studies and developing and evaluating current assets of the Group.

In addition to national and international real estate management of the Group, it is responsible for determining and projecting investment areas by making the correct analysis of the needs.

Assan Real Estate Development & Investment Inc. continues its commercial activities based on its objectives.

ASSAN CONSTRUCTION INC.

Established in 2007, Assan Construction Inc. made a fast entrance to the industry in order to provide service in each and every area of construction. Giving service from its headquarter in Tuzla, İstanbul, Assan Construction Inc. uses all the technologies of the era and continues its growth. The company first started with " Assan Construction- Kurtköy Houses ". Construction of Pendik - Kurtköy Houses was completed in 2009 and life began.

"Asım Kibar Anatolian Hotel Management and Tourism Vocational High School" in Tuzla, Tuzla Municipality "Semiha Kibar Social Facilities" and Tuzla "Semiha Kibar Teacher Guest House" projects were completed and opened to service.

Tuzla Municipality "Şelale Park" project has been established on 110.000 hectare field in Aydınlı neighborhood of Tuzla.

Construction of 26,000 m² factory inside Kocaeli Dilovası Plant by Assan Aluminum, has been finalized and opened to service. Revisions of the existing buildings were completed and the Painting Line Plant with a closed area of 13,000 m² was put into operation in 2013.

« Additional Production Plant» project for construction activities performed in Kocaeli region on behalf of Assan Hanil Automotive Industry and Trade Inc. was started as of August 7th, 2012. Having 12.150 m² construction area and approximately 11.500 m² open car park, the project was completed in approximately 8 months. Assan Hanil Additional Production Plant has 6 divisions. The first stage of the project was completed; second stage, having approximately 6.200 m² closed stock site was also completed and started its operations.

Improving continuously by following new technologies, having a strong position in construction industry with its projects, managerial and technical personnel, Assan Construction Inc. continues growing with its first day effort and determination.

ASSAN INFORMATION TECHNOLOGY INC.

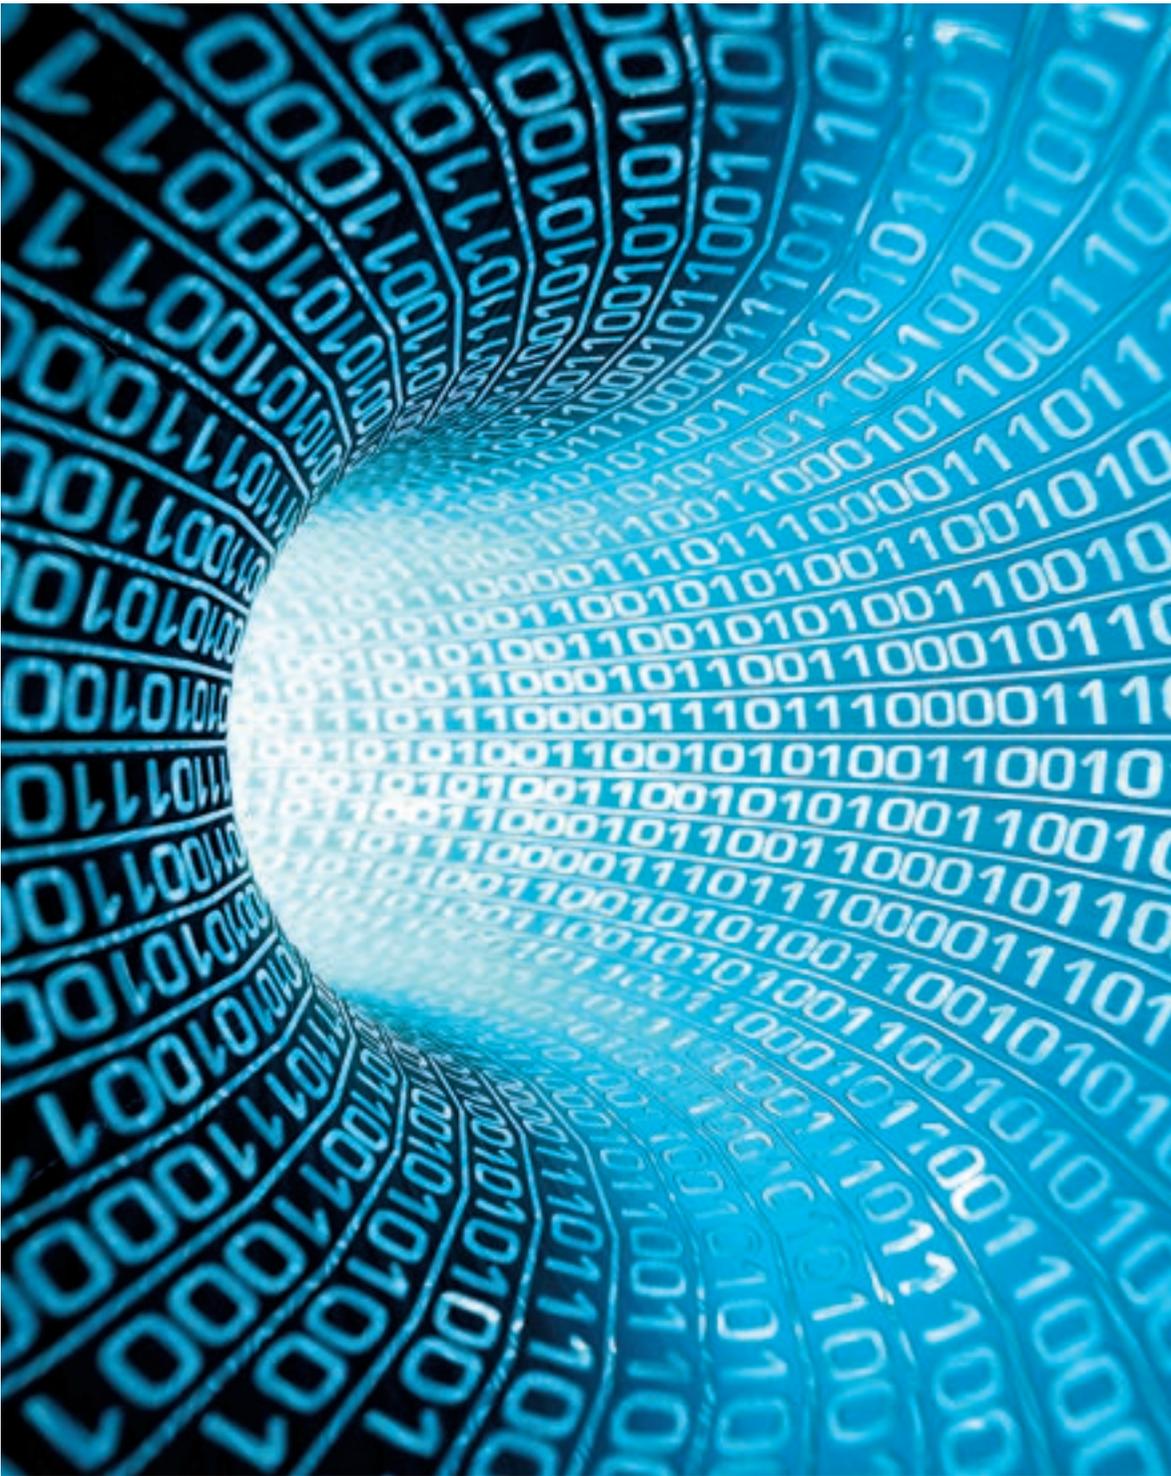

Assan Information Technology, aiming to be one of the pioneers in the information technologies and communication industry, operates to meet in-group and non-group customers' needs regarding technology and processes with innovative, sustainable and reliable solutions since its establishment. It acts upon the principle of service to customers beyond their expectations, with the solutions developed through the understanding of end-to-end service in information and communication services. Assan Information Technology is primarily a technology and consultancy company providing services such as developing customer-specific enterprise resource planning solutions, Microsoft Axapta consultancy, project management, establishment of information security management system, emergency operations center services, system development, system support, hardware and integratorship services, data center, call center, software selection, process development and desktop support services.

It embraces customer orientation and quality as the primary objective in each work performed with its accumulation of knowledge in aviation, automotive, international trade, metal, prefabricated construction, financing, logistics, food, insurance, technology, construction, packaging, energy and retail industries.

Thanks to the business partnerships developed with leading technology companies across the world, it provides cost advantage to in-group and non-group customers. It aims to minimize risks while increasing operational efficiency with its accumulation of knowledge and project experience in selection and supply of new technologies and computer hardware and software products, and adaptation of the processes to new technologies.

In accordance with the "Vision 2023" theme, it sets the essential aim as developing projects which master science and technology, utilize technology consciously and whose focus is on acquiring skills of transforming technological developments into social and economic benefits. In this context, it has successfully completed ISO 27001 information security consultancy and e-invoice projects. It will continue to prioritize the projects required by the legislation and Turkish Trade Law in the upcoming period as well.

Employees of Assan Information Technology, whose most substantial asset is Human Resources, consist of internationally certified expert personnel on information technologies, with accumulation of processes from various industries, who successfully completed educational academies of leader technology firms.

KİBAR HOLDİNG CORPORATE PROFILE

ASSAN
LOJİSTİK VE FİLO KİRALAMA

ASSAN LOGISTICS & FLEET LEASING INC.

LOGISTICS

Established in 1996, Assan Logistics & Fleet Leasing Inc. provides national and international door-to-door logistics service. It provides domestic transportation, heavy transportation, warehouse, storage, distribution and stocking, marine shipment, lashing, handling, inspection and customs services throughout Turkey. For international transportation, our company performs Multimodal Transportation, International Land Transportation, International Air Transportation, International Marine Transportation, International Rail Transportation and heavy transportation operations.

Headquartered in Kartal, Istanbul, Assan Logistics has branches in Ankara, Tuzla, Gebze, Çorlu, Iskenderun, Mersin and Gaziantep. Being one of the most reliable and reputed companies of logistics industry, Assan Logistics provides creative, productive and low budget services to all industries with its information technologies infrastructure and applications, strong financial structure and partners, service variety, alternative solutions and transportation certificates.

It continues growing with its mission and vision undertaken with Kibar Holding culture and security.

FLEET LEASING

Established to provide operational fleet renting service to Kibar Holding, Group companies and partnerships in 2001, Assan Fleet Leasing managed to provide its group experience and boutique service understanding to other non-group companies as of 2012.

Established in 1996 and having commercial title Assan Transportation and Industry Inc. until 2012, Assan Logistics and Fleet Leasing focused on restructuring Fleet Leasing which is one of its two main areas of activity as of 2012 and increased its service quality over market standards.

It has targeted customer satisfaction and expanded its satisfaction and quality pool with 26% growth in 2012 with its customer-oriented approach.

Adopting the motto "...in every field, for all your needs..." Assan Fleet Leasing continues growing with firm steps in fleet renting industry by combining its brand and independent vehicle variety with service understanding shaped according to the customer needs.

It has started 7/24 ASSAN Fleet Leasing call center and road help line service in early 2013.

ASSAN PORT OPERATOR INC.

Assan Port was opened by Assan Port Operator Inc., at the end of 2010. Becoming the first container terminal providing service to modern container ships at İskenderun Bay as of its date of opening, Assan Port has become the second and a very important alternative after Mersin for hinterland. Having yearly 250.000 TEU capacities, the terminal targets to reach to 550.000 TEU capacity with its investments in a very short time.

Assan Port is geographically providing advantages for companies in Eastern Mediterranean, Southeast Anatolia and Central Anatolia and it is the closest container terminal opening to west for Northern Iraq. Providing 7/24 high standards security, the port provides limitless and high quality service to its customers with its expert personnel.

KIBAR INSURANCE BROKERAGE SERVICES INC.

Organizing all active assets and liabilities, Risk Management and Insurance transactions of Kibar Holding with its over a quarter-century experience, Kibar Insurance continues providing these services in a consistent and credited way with its understanding "Value Creating Insurance".

Directly cooperating with financially powerful and reliable national and international insurance markets and insurance companies, Kibar Insurance is aware of the fact that the values of our country and companies should be very well protected. It believes these values should be transferred to the next generations in a safe and developed way.

Aiming "to provide counseling service to any and all individuals and corporates demanding", Kibar Insurance gives full support to the insured in subjects such as effective risk management (detection and analysis, control and transfer of risk), indemnification of damage in a right and fast way, tracking rights and liabilities. Our company closely follows legal changes, market conditions and developments in insurance industry and provides the widest warranties and most competitive costs to its customers.

By providing risk management and customer based service to in-group and non-group industrial and service plants and individuals with a broker's mentality on the road to European Union, our company is operating in all insurance branches below including special risks;

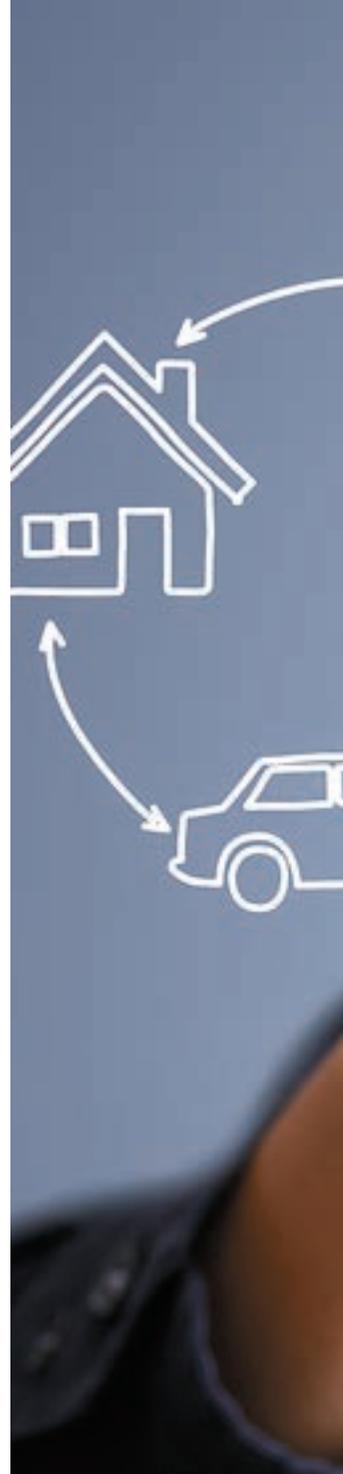

- Fire, Natural Disaster and Other General Damages (Construction, Installation Machinery Breakdown etc.) Insurance.
- Shipment and Transportation Insurance.
- Financial Loss and Profit Loss Insurance.
- Accident and Vehicle (Land, Air, Marine and Railway Vehicles) Insurance.
- Responsibility (General, Financial, Professional and Vehicle Responsibility) Insurance.
- Credit and Breach of Trust Insurance.
- Legal Protection Insurance.
- Disease/Health Insurance.
- Agriculture Insurance.

SICPA ASSAN PRODUCT SECURITY INDUSTRY & TRADE INC.

Sicpa Assan was established as a joint venture between Kibar Holding and Switzerland's long-standing Sicpa Group in 2007. Today it provides high-technology solutions for Brand Security, Product Monitoring and Tracking Systems which are very important for public and private industries.

Industry and sector specific applications are developed in order to track products in supply chain and separate artificial-original products. Public agencies prevent unrecorded, artificial and illegal products with Sicpa Assan's technological service and solution packages. Installing and managing Banderole Product Track and Trace system for tobacco and alcoholic beverages was initiated by the Revenue Administration in 2007 in Turkey.

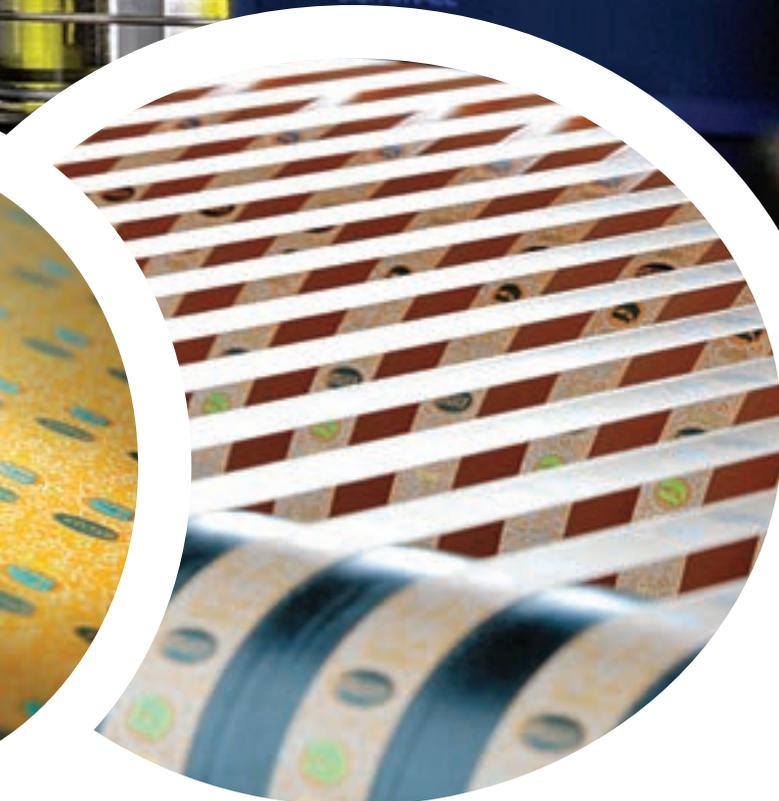

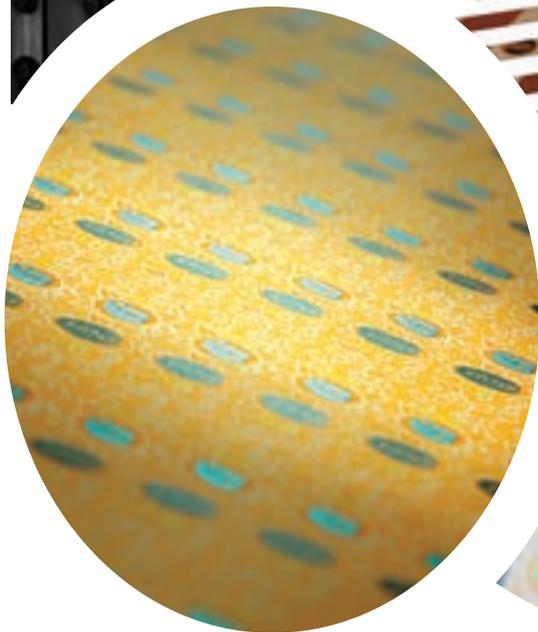

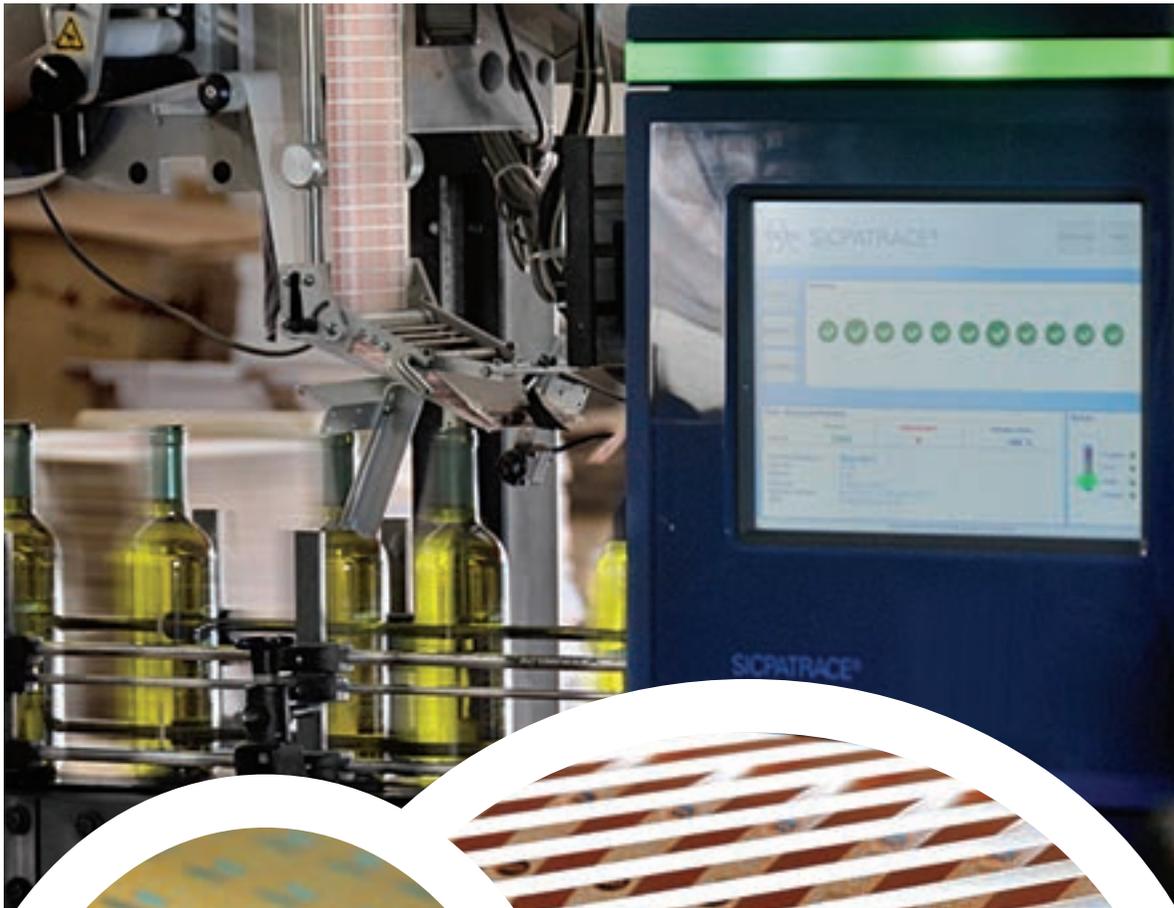

Private sector companies prefer our systems for product traceability and brand protection. Product Track and Trace system that is designed and developed by our company with a combination of security technologies, private security ink applications, hardware and software; System Supply and Installation, System Management and Operation, Technical Service and Guarantee Services are the most desired bundles in this area.
