ASSAN ALÜMİNYUM Sanayi ve Ticaret A.Ş.

Assan Alüminyum is a leading manufacturer of the flat rolled aluminium sector, producing flat rolled products (coil, sheet and foil) since its establishment in 1988. Operating as a subsidiary of Kibar Group, its two plants in Tuzla (İstanbul) and Dilovası (Kocaeli) have a combined capacity of 280 thousand tons of flat rolled products (FRP), making Assan Alüminyum the clear leader in its sector in Turkey and one of the leading FRP manufacturers in Europe, as well. In 2013, a new coil coating plant of 60 thousand tons began production. Assan Alüminyum is included in the İstanbul Chamber of Industry (ISO) list of Top 500 industrial companies of Turkey.

Assan Alüminyum accounts for more than half of the flat rolled aluminium production in Turkey and exports to more than 70 countries around the world, particularly to

the Western European markets and offers its customers logistics advantages using warehouses operated in various countries. With more than 1000 employees, Assan Alüminyum products are used in a wide variety of sectors such as distribution, construction, transportation, consumer durables and packaging. With a proven track record of exceeding customer expectations, Assan Alüminyum is frequently selected as the supplier of the year by many of its customers.

Assan Alüminyum is included in the Istanbul Chamber of Industry (ISO) list of Top 500 industrial companies of Turkey.

ASSAN HANİL Otomotiv Sanayi ve Ticaret A.Ş.

One of the automotive investments of Kibar Group, Assan Hanil was founded in 1997 with the partnership of South Korean Seoyon E-Hwa and started its activity as Sub-Industry Manufacturer in automotive sub-industry sector. While it was supplying spare parts only for Hyundai Assan during the first years of its establishment, it was included among the significant suppliers of Ford-Otosan by 2005 as well. Further undertaking manufacture of important parts of M2 class minibus, which is the joint project of Karsan and Hyundai Motor Company, Assan Hanil also added Isuzu and Honda in its customer portfolio.

In its 80 m² facility in total, in three different locations, two of which are in Kocaeli and the other one is in Bursa, Assan Hanil makes production with high technology based on automation with more than one thousand specialist employees.

Driver (passenger) seats, door panels, front and rear bumpers, instrument panels in particular, parts such as blow parts, console, etc. are among the most requested products.

Assan Hanil certified its manufacturing quality thanks to ISO 9001-2008, ISO/TS 16949, ISO 14001, ISO 27001, OHSAS 18001, Ford Q1 and Hyundai 4 Star Quality System certificates. With the support of Ministry of Industry and Trade, it has been carrying out studies on innovative projects for diminishing weight, cost optimization and quality increase in the R&D center, established in 2011. It has 18 intellectual property rights in different categories. In addition to this, it has 15 patent applications under assessment phase.

Following the capacity increase and recent projects of its clients with the investments completed in 2014, it manufactured the first functional prototype seat for the project regarding the air-suspended commercial vehicle driver seat with a unique design, high export capacity, which was developed in its R&D department, founded within the corporate, and that will enable the company to grow and enhance. Prototype seats are now carrying on their trial excursions in customers' vehicles. It is planned to proceed with serial production until the end of this year.

With the R&D center, founded within the corporate, Assan Hanil maintains its operations non-stop in order to perform its vision, i.e., "to be a global company, which is a leader in Turkey that offers unique solutions based on safety, comfort and aesthetic in transportation vehicles"

ASSAN PANEL Sanayi ve Ticaret A.Ş.

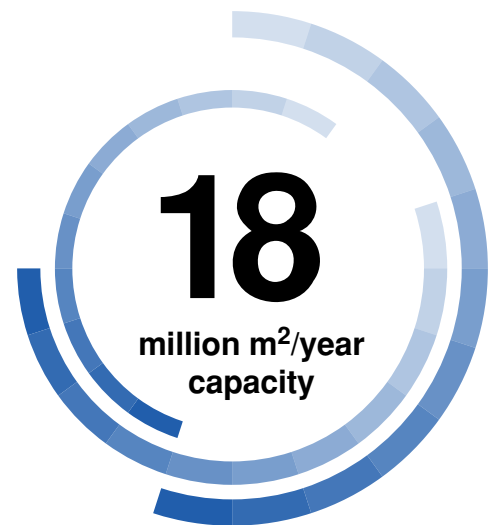

The leading organization of sandwich panel industry, Assan Panel started production in 1990 with its first factory in Tuzla, İstanbul with an annual capacity of 4 million m² in a year.

Maintaining its investments throughout the years in order to enhance its capacity, Assan Panel invested in Iskenderun facility with a capacity of 3 million m²/year, Balıkesir facility with capacity of 3 million m²/year, and Jordan facility with a capacity of 4,5 million m²/year, respectively in 2004, 2009, and 2012. As for 2015, Tuzla İstanbul Facility with a capacity of 3,5 million m²/year reached up to a capacity of 18 million m²/year following the successful completion of the second line investment of the same. Far and away in the leading position in its sector, Assan Panel contributes to construction of safe buildings thanks to rock wool-filled sandwich panel products and PIR (polyisocyanurate)

which ensures fire safety as well as polyurethane-filled panels. It also provides superfine application service with its business associates both at home and abroad thanks to quality, reliable and fire-resistant product range.

Breaking the grounds in the sector, Assan Panel is the unique manufacturer in Turkey, holding FM approval without height restriction in the buildings thanks to the FM certificate obtained in 2015. Taking an active role in global market, the company is on the way to be global player in the sector quickly thereby carrying out exportation to 42 countries.

Assan Panel has an annual production capacity of 18 million m² a year.

KİBAR INTERNATIONAL A.Ş.

Founded in order to support import and export of Kibar Group companies, Kibar International is active in the heart of Europe and Lausanne, Switzerland, a close area to finance circles. Pursuant to establishment objectives, it performs operations for finding proper suppliers regarding all foreign purchases and mediating exportation, notably raw material requirements. Providing finance with suitable costs, it gains significant advantage to the group in stiff competition environment in the economy of increasingly globalized world.

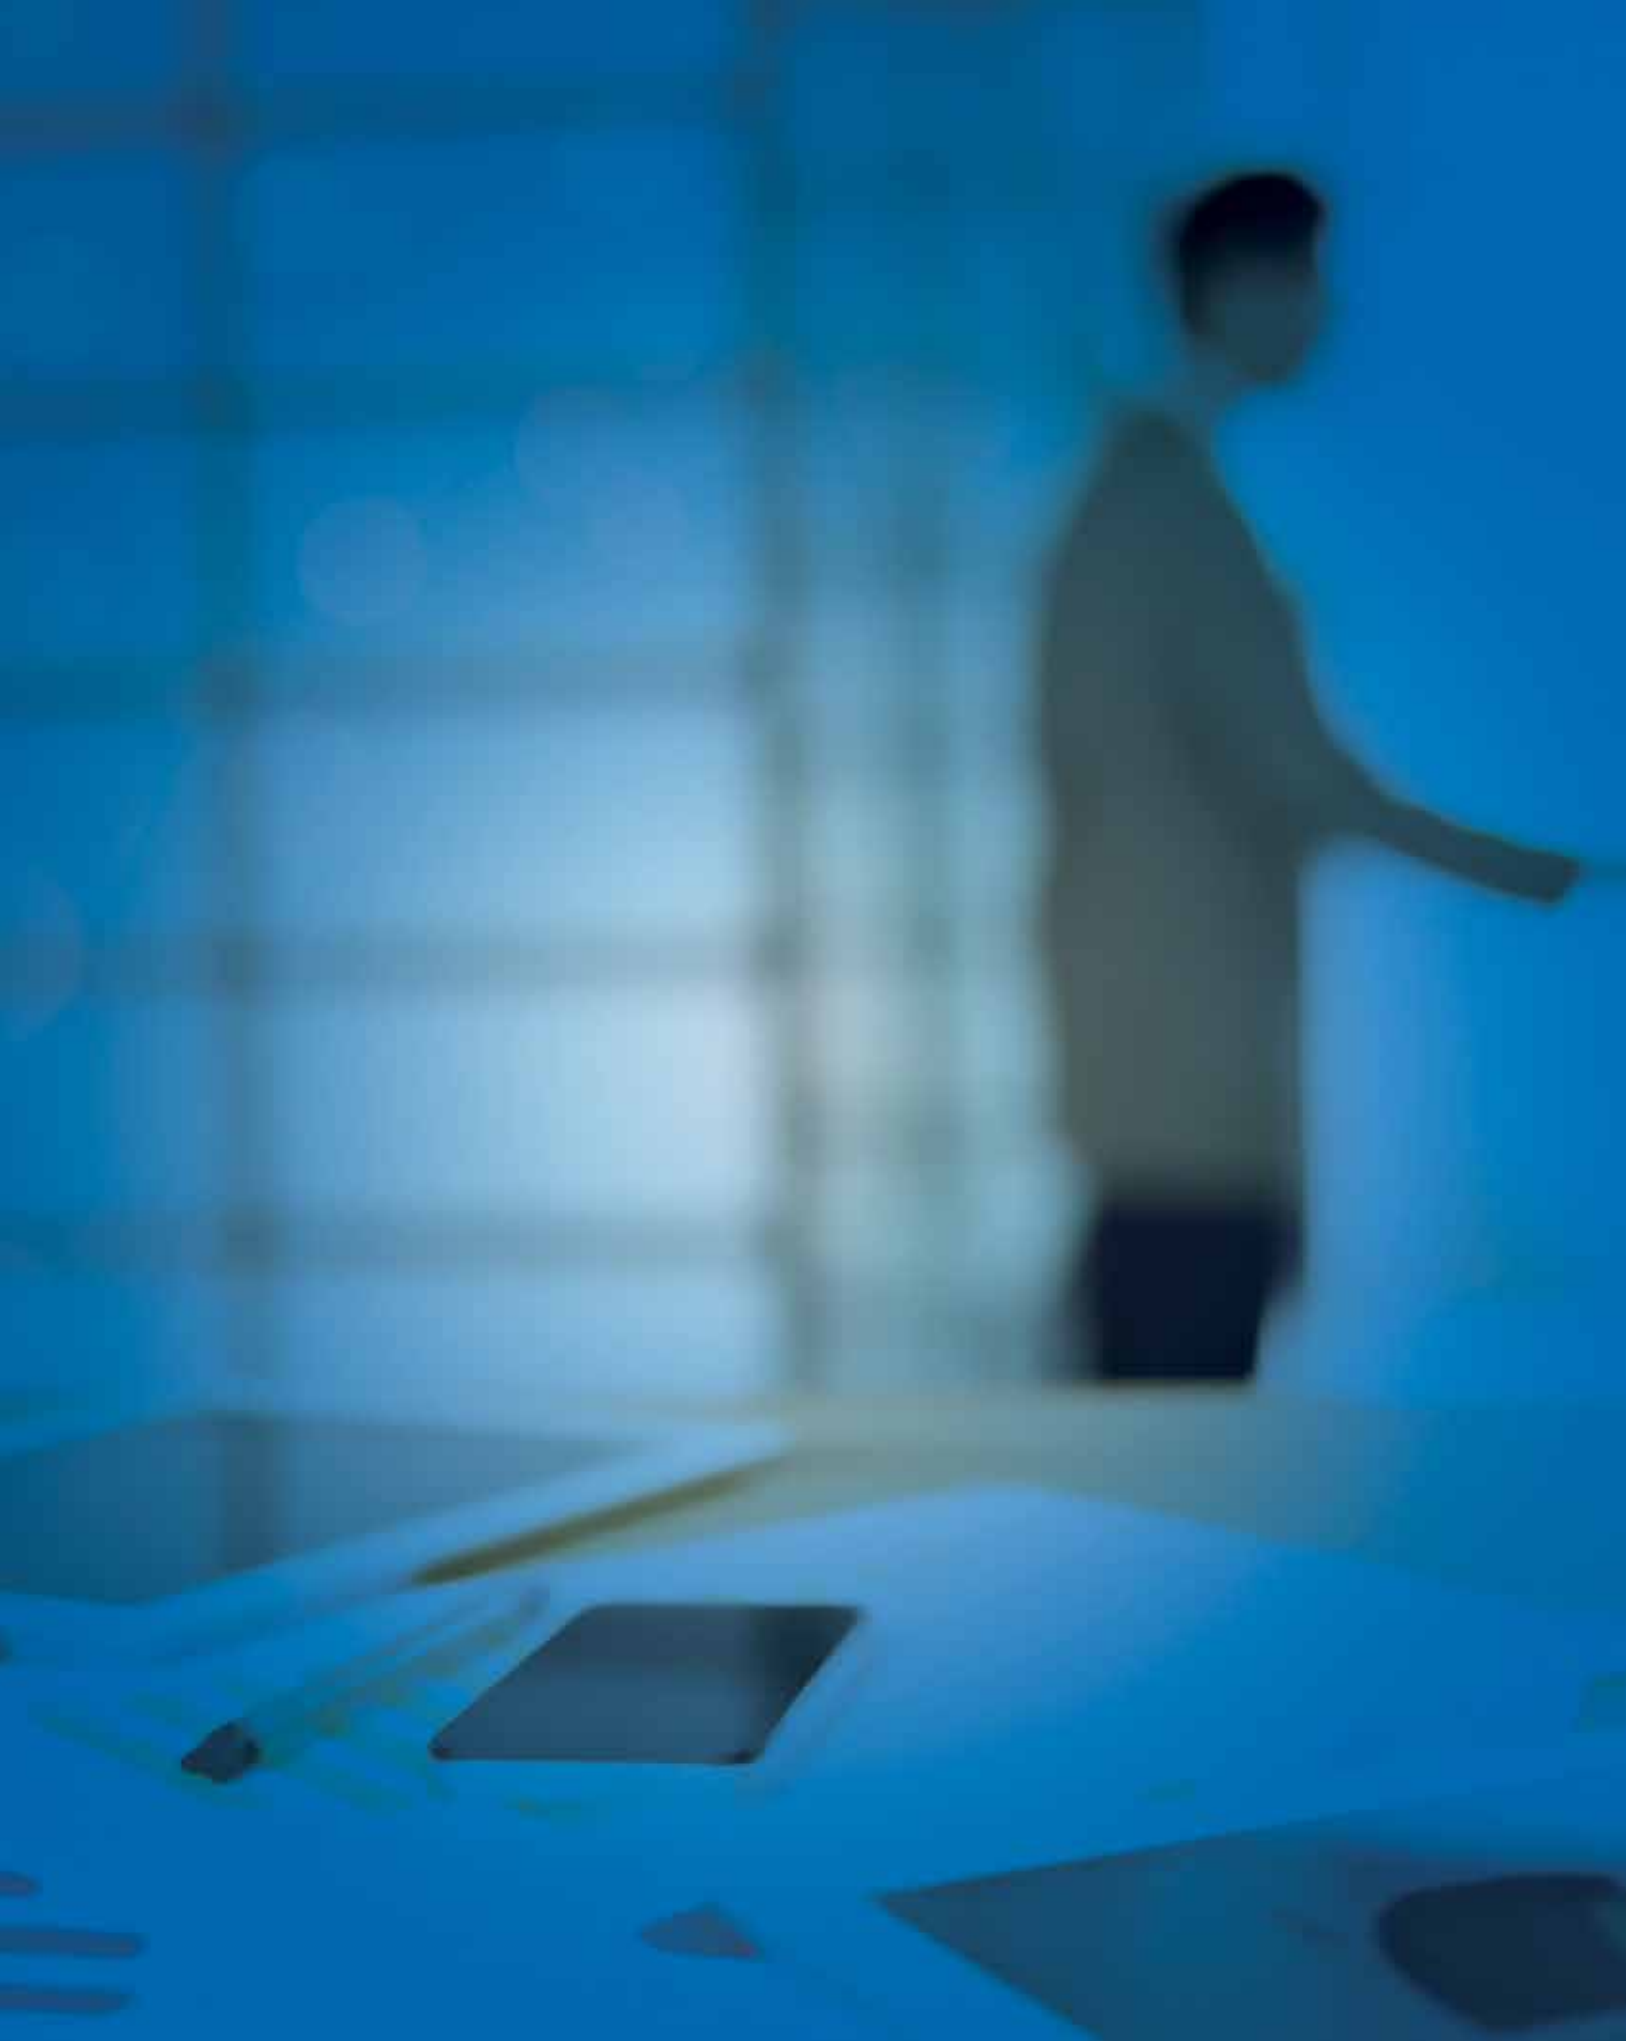

Working in close cooperation with the leading banks and insurance companies of Europe, Kibar International eliminates important risks by securing commercial

receivables with insurance coverage and helps group companies carry out their foreign trade in compliance with international practices and norms.

Kibar International supports importation and exportation of the group in Europe.
