Kibar Holding in its 45th Year

Kibar Group has started its activities in the areas of industry, service and commerce with the Flat Steel Service Center established in 1972. Each of its group companies is the leader of its industry.

Thanks to its reputation and brand image, strong partnership and the knowledge of and experience in Turkish markets, Kibar Group has grown in its main areas of operation and become one of the important forces contributing in the development of Turkish economy. The international business partners of Kibar Group include many leading international partners such as Hyundai, THY, Posco, TIL, Seoyon E-Hwa and Heritage.

Its industry group includes Assan Alüminyum (Assan Aluminium), Assan Gıda (Assan Foods), Assan Hanil, Assan Panel, Ege Assan, Hyundai Assan, İspak Ambalaj (İspak Packaging), Posco Assan TST and TSI Uçak Koltuk Üretim (TSI Aviation Seats Production) companies.

Its trade group companies include Assan Gayrimenkul (Assan Real Estate), Assan Yapı (Assan Construction), Kibar Dış Ticaret (Kibar Foreign Trade), Kibar Enerji (Kibar Energy) and Kibar International companies.

Its service group includes Assan Bilişim (Assan Information Technology), Assan Lojistik (Assan Logistics), İnteraktif Çevre Danışmanlığı (Interactive Environmental Consultancy) and Assan Port companies.

While coordinating risk management, strategy and business development, human resources and corporate relations functions, Kibar Group aims to increase the benefits for its employees and stakeholders by leveraging its guiding and supportive role that it has created within the community.

Assan Alüminyum is ranked 41st in ISO's list of top 500 largest industrial companies of Turkey.

Assan Alüminyum

Assan Alüminyum (Assan Aluminium), the leading manufacturer in the flat rolled aluminium sector, has been manufacturing flat rolled aluminium (coil, sheet and foil) products since its establishment in 1988. Conducting its manufacturing operations as a subsidiary of Kibar Holding, in its plants located in Istanbul Tuzla and Kocaeli Dilovası, Assan Alüminyum has an installed capacity of 300 thousand tons per year. In addition, it has an aluminium painting capacity of 60 thousand tons per year in its roll painting plants.

Assan Alüminyum is ranked 41st in ISO's (Istanbul Chamber of Commerce) list of top 500 largest industrial companies of Turkey. Accounting for more than half of the production of Turkey, Assan Alüminyum exports to more than 70 countries all around the world, including, particularly the European Union states and offers logistic advantages to its customers with its warehouse facilities in various countries. With more than 1,300 employees, Assan Alüminyum offers its products for a variety of sectors such as distribution, construction, transportation, consumer durables and packaging. Having become one of the most important manufacturers of Europe, Assan Alüminyum is selected as the supplier of the year by many of its customers every year.

Due to the importance that it pays to the usage of renewable energy, Assan Alüminyum acquired Manavgat Hydroelectric Power Plant in 2016. It will implement its new investments for increasing its casting and foil capacity within 2017. Thanks to the two new casting lines and one new foil mill that will start production by the end of the year, the total aluminium foil capacity will reach 100 thousand tons. In addition, the negotiations are ongoing for new investments in the aluminium sector, which will allow for manufacturing high value-added products. With the increased employment and export, this investment will make positive contributions in our company's foreign trade balance. In addition, it will also play an important role in the development of strategic sectors that need high-performance aluminium products such as defence, aviation, machinery, shipbuilding, automotive and flexible packaging.

Assan Hanil

One of Kibar Group's automotive companies, Assan Hanil was established in 1997 with the partnership of the South Korean Seoyon E-Hwa company and started production as an Original Equipment Supplier (OES) in the automotive industry. While it was supplying parts for Hyundai Assan only in the early years of its establishment, it has become one of the important suppliers of Ford-Otosan as of 2005. Assuming also the production of important parts of an M2 class minibus, the joint project of Karsan and Hyundai Motor Company (HMC), Assan Hanil has added Isuzu and Honda to its customer portfolio.

With over one thousand specialized employees working in its plants with a total area of 80 thousand m² in three different locations including two plants in Kocaeli and one plant in Bursa, the company carries out automation-based production activities with high technology.

The parts including, particularly, driver (passenger) seats, door panels, front and rear bumpers, front control panels, blow moulding parts, glove compartments, etc. are considered among its mostly demanded products.

Assan Hanil has certified the quality of its production with ISO 9001-2008, ISO/TS 16949, ISO 14001, ISO 27001, OHSAS 18001, Ford Q1 and Hyundai 4 Star Quality System Certificates. It conducts studies on innovative projects for weight reduction, cost optimization and increased quality in its R&D center established under its own structure in 2011 with the support from the Ministry of Trade and Industry. The company is currently the owner of 12 registered utility models, 9 industrial designs and 8 patents; and there are 29 Intellectual Property Rights pending under the evaluation process.

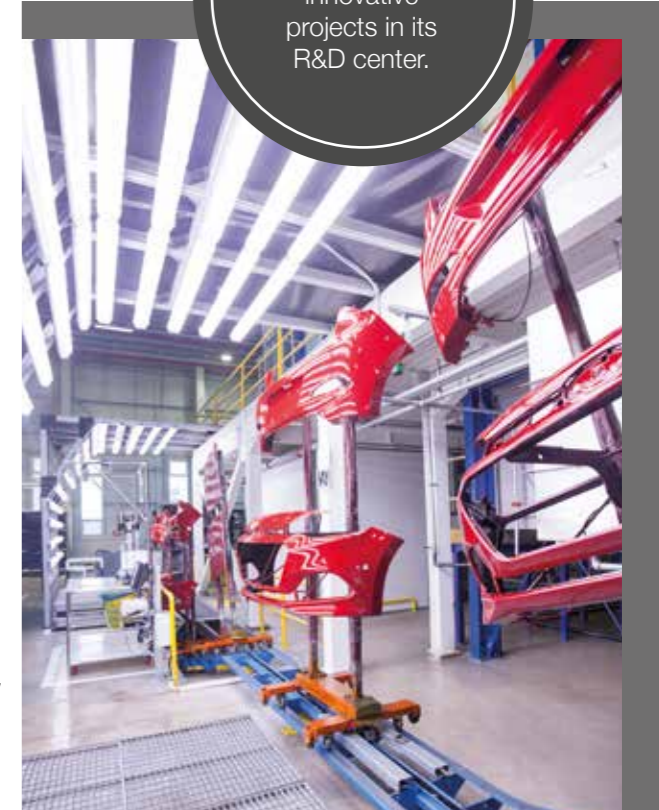

In 2012, Assan Hanil established Uçak Koltuk Üretimi Sanayi ve Ticaret A.Ş. (Aviation Seats Production Industry and Trade Co. Inc.) jointly with Turkish Airlines and THY Teknik A.Ş. in order to produce aviation seats in Turkey.

Having completed its first designs by obtaining ADOA (Alternative Procedures for Design Organisation Approval), POA (Production Organisation Approval) and ETSOA (European Technical Standard Order Authorisations) certifications, TSI began mass production in 2014. The seats produced for Boeing and Airbus are used in the aircrafts.

Following the capacity increase and recent projects of its customers with the investments completed within 2014, Assan Hanil produced the first functional prototype seat for the project on air-suspension driver seats for commercial vehicles developed in its R&D center established under its own structure with a unique design and high export potential, which will enable the company to grow and expand further.

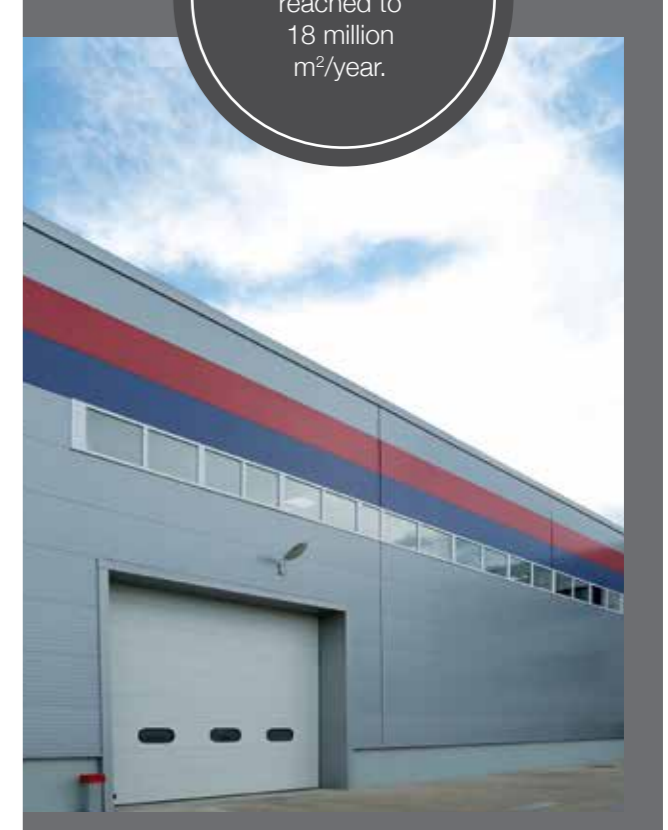

It is planned that the mass production of air-suspension driver seats for commercial vehicles launched at IAA Hannover Commercial Vehicles Fair in the 3rd quarter of 2016 will be started in 2018.

Assan Hanil conducts studies innovative projects in its R&D center.

Assan Panel capacity has reached to 18 million m²/year.

Assan Panel has added its galvanized sheet metal experience of its group since 1980 to its own structure to provide its customers with galvanized sheet metal products and services mostly for the construction and building sector.

Products in the flat product group according to the needs of construction and building sector companies, are kept in stock for customer demand and presented to customers.

Under the products groups that are the main items of galvanized and prepainted sheet metal are also roll, panel, grooved, blind and corrugated sheet products.

Assan Panel, a leader in the sector by a wide margin ensures fire safety by using polyurethane, PIR (polyisocyanurate) and rock wool insulation materials in its sandwich panel products and contributes to the construction of safe buildings.

The company provides superior quality application services with a good quality, safe and fire resistant product range and business partners, both domestic and international.

Assan Panel, a company that has pioneered many firsts in the sector, earned an FM certificate in 2015 to become the only producer in Turkey with FM approval without height restriction on buildings. Guiding the sector with its quality approach, Assan Panel also holds certificates accepted worldwide like LPCB, UL GREENGUARD, GOST, SEPRO.

By playing an active role in the global market and exporting to 42 countries, Assan Panel is on the fast track to becoming a global player in the sector.

Assan Panel

The leader in the sandwich panel sector, Assan Panel, started production in 1990 at its first factory with a capacity of 4 million m²/year in Tuzla.

The company invested in a 3 million m²/year facility in Iskenderun in 2004, a 3 million m²/year facility in Balıkesir in 2009 and a 4.5 million m²/year facility in Jordan in 2012. In 2015, the company completed its investment in a second line at the 3.5 million m²/year capacity Tuzla Istanbul facility and reached a capacity of 18 million m²/year.

The Jordan facility of Assan Panel is installed on an indoor area of 6,500 m² and outdoor area of 10,000 m² with a fully automated production line equipped with the newest technology and is the largest sandwich panel producer in the Middle East with a capacity of 4,5 million m².

Ege Assan

Ege Assan was established by Assan Gıda Sanayi ve Ticaret A.Ş. in Ege Serbest Bölgesi in İzmir in 2010 for tomato paste production in order to increase the competitive power in the global markets and to meet customer needs and expectations.

Tomato paste, the raw material of the products manufactured in the plant, is procured from Turkey and also imported from California, USA, the zone processing the highest amount of tomatoes in the world and after the reprocessing in İzmir facilities, it is filled in tin and glass containers.

Products are exported to the Northern Africa, Middle East and Arabian Peninsula and the sales activities toward other countries are successfully continued.

Hyundai Assan İzmit Factory has maximum production capacity of 245 thousands of vehicles per year by 2017.

Hyundai Assan

Celebrating the 20th year of their production in Turkey in 2017, Hyundai Assan is jointly managed by 70 percent Hyundai Motor Company and 30 percent Kibar Group partnership. As the compact automobile station of the brand established with a total investment of 1.2 billion TL, Hyundai Assan exports to more than 40 countries over 230 thousand units of i10 and i20 models produced with its 2 thousand and 800 employees. Germany, United Kingdom and Italy are the countries with the highest volume of exports of the brand. Hyundai Assan is among the most favoured automobile brands in Turkey; and more than 50 thousand units of vehicles are sold via the network comprising 72 dealers spread throughout the country.

Hyundai Assan İzmit Factory established over a total area of 1 million m², the first production plant established by Hyundai Motor Company in overseas countries, has a maximum production capacity of 245 thousands of vehicles per year

by 2017. Manufacturing 36 units of i10 and i20 models per hour, the plant delivers each completely produced vehicle to the related owner after checking it from 1,500 points.

Ispak Ambalaj

Established in 1974, Ispak offers products and services for flexible packaging sector with its experience of over 40 years and its innovative and modern personnel. The company manufactures packaging solutions for any processed food, candies, chocolate, milk and dairy products, pharmaceuticals, cigarettes, beverages, household appliances, and insulation industries. With its 298 employees, the current facility has a production capacity of 15,000 tons per year.

Ispak is increasing its current production capacity three times with the largest flexible packaging investment made in Turkey. With a production capacity of 40 thousand tons per year and high production speed, its new plant will become one of the largest plants of Europe in this field; and after completion of the investment, the total number of employees of Ispak Ambalaj will reach to 450 people.

Manufacturing with high technology and extensive knowledge, Ispak develops special packaging solutions according to its customers' needs on an individual basis and aims to ensure food safety in the design of materials, maintain their tastes, develop optimum barrier against moisture and oxygen, extend shelf life and offer ease of use to consumers.

Making its way using the motto "For customised packaging, you can rely on Ispak. Keeping our word since 1974." and having added doypack, special-cut lids and cone materials to its product range, Ispak is continuing to offer a wide range of services to its customers.

Ispak has been implementing ISO 9001:2008 quality management system, ISO 22000 food safety, BRC IoP global standard for packaging and packaging materials

management systems and OHSAS 18001 occupational health and safety, ISO 14001 environment and ISO 27001 information security management system; and it has been awarded with the Award For Excellence in Consistent TPM Commitment, the second step of the TPM process. Having become a member of

SAVE FOOD platform, the company supports the project based on its main goals of raising awareness on the effects on food loss and waste and finding solutions to this problem, promoting widespread use of packaged products and prevention of food waste by extending shelf life of the products with alternative packaging solutions. Also a member of ESA (European Snacks Association) and INC (International Nut and Dried Fruit Council) in addition to SAVE FOOD platform, Ispak is also continuing to raise awareness in the international platforms.

TSI Uçak Koltuk Üretimi San ve Tic. A.Ş. (TSI Aviation Seats Production Industry and Trade Co. Inc.) was established as a joint venture of Kibar Holding, Turkish Airlines and Turkish Technic companies. TSI has been producing aviation seats under its EASA and FAA authorizations; and the seats produced are used on A320, A330, B737 and B777 aircraft series. TSI manufactures aviation seat spare parts under its PMA (Parts Manufacturing Authority) authorization and renders maintenance services under its Part 145 certificate. Having two production lines in İstanbul and Utah, TSI Uçak Koltuk Üretimi A.Ş. conducts design, engineering, manufacturing and R&D activities under its own structure.

As a result of the audits conducted by EASA (European Aviation Safety Agency), the company received ADOA (Alternative Procedures to Design Organisation Approval) in November 2012 and POA (Production Organization Approval) in December 2013; and the company has been manufacturing aviation seats under its EASA and FAA (Federal Aviation Administration) approvals. The seats produced by TSI are actively used A320, A330, B737 and B777 aircraft series.

Having completed orders for 54 aircrafts in total by the end of 2016, TSI has outstanding orders for 192 aircrafts which will be shipped between the years of 2017-2023.

With its team of 70 people, TSI conducts design, engineering, manufacturing and R&D activities in its new facilities covering an area of 1,000 m² in HABOM (Aviation Maintenance Repair and Overhaul Center) pertaining to Turkish Airlines located in İstanbul Sabiha Gökçen Airport.

The company named TSI SEATS Inc. established by TSI for the American aviation sector operates in Salt Lake City, Utah. Having a production capacity of 10,000 pax (passenger) seats per year, TSI has been certified by FAA with TSO certificate as a result of the activities and audits conducted with FAA.

The projects completed and put into service by Assan Yapı include, inter alia, Pendik - Kurtköy Houses, Asım Kibar Vocational and Technical Anatolian High School, Tuzla Municipality Semiha Kibar Social Facilities, Tuzla Semiha Kibar Teachers' Lodge, and Tuzla Municipality Şelale (Waterfall) Park projects.

In addition, one of the group companies investments, Assan Alüminyum Kocaeli Dilovası Factory Construction and Paint Line Plant revision and Assan Hanil Additional Production Plant projects were also completed by Assan Yapı.

Assan Yapı had, under the capacity as the contractor, undertaken the works related with "İspak Packaging

Factory" project, the ground breaking ceremony of which was held in Asım Kibar Organized Industrial Zone within the boundaries of İzmit in June 2016 and is proud of having completed the factory that will be considered among the largest packaging plants of Europe within the year 2016.

Constantly renewing itself, closely following the technology, and establishing a strong presence in the construction sector in a short time with its projects, administrative and technical personnel, Assan Yapı continues its operations with the determination and perseverance just like the very first day of its establishment.

Kibar Dış Ticaret is in the list of "Top 5 Exporters of Turkey" announced by the Turkish Exporters Assembly.

Kibar Dış Ticaret

Kibar Dış Ticaret (Kibar Foreign Trade) is the foreign trade company of Kibar Group, one of the leading industrial institutions of Turkey.

It was established in 1985 in order to play a leading part in the foreign trade movements initiated in our country and to organize the foreign trade events as the company of Kibar Group specialized in this field.

Today, the company provides export services to many leading private and public industrial companies of Turkey as well as import services for meeting some of the raw material needs of such companies. In addition, the company carries out high-tonnage trade from foreign countries to third countries.

The company's foreign trade volume has displayed a stable growth and reached to 1.5 million tons per year. With its widespread contact points all around the world and accumulated foreign trade know-how and knowledge, Kibar Dış Ticaret is an original representative of the group's strong commercial culture.

Kibar Dış Ticaret is one of the top 5 exporting companies in the list of "Top 1000 Exporters of Turkey" announced by the Turkish Exporters Assembly in 2016.

Kibar Enerji

Kibar Enerji (Kibar Energy) was established in 2011 under the structure of Kibar Group to conduct importation and wholesale of natural gas in Turkish Energy Market. Kibar Enerji acquired 1 billion m³/year of natural gas purchase-sale contract under the West Line Contract transfer in 2012; and has become entitled to conduct importation and wholesale of natural gas as of 1 January 2013. Kibar Enerji aims at becoming one of the leading players of Turkish Energy Market which has become more liberalized with the gradually increasing participation of the private sector.

Kibar Enerji's main objectives are to contribute in the meeting of the country's natural gas needs by purchasing natural gas from domestic and/or foreign resources, to take a suitable role in the establishment of natural gas market in line with the best interests of the country,

to conduct necessary activities for storage of natural gas, to make use of the opportunities that will create supply security and resource diversity in Turkish Energy Market, and to take necessary actions to realize new business and investment opportunities.

Kibar International

Established with a view to support export and import operations of Kibar Group companies, Kibar International conducts its activities in Lausanne, Switzerland, as a spot in the heart of Europe and close to financial circles. As required by its purpose of establishment, the company makes efforts for finding eligible suppliers for all overseas procurements including, particularly, raw material requirements, and for mediation in the exportation activities.

It provides significant advantages for the group by securing cost-effective financing in the sharp competitive environment in our globalizing world economy.

Working in close collaboration with the leading banks and insurance companies of Europe, Kibar International also eliminates important risks by insuring trade receivables and provides assistance for ensuring compliance of the group companies' foreign trade operations with the international practices and norms.

Assan Port was put into service by Assan Liman İşletmeleri A.Ş., one of Kibar Group companies in İskenderun Organized Industrial Zone in June 2010. Assan Port İskenderun, the first container terminal providing services for modern container ships at İskenderun Bay, has become the second and a very important alternative following Mersin for the same hinterland. The company continues its business activities with the partnership made with TIL (Terminal Investment Limited SA) by the end of 2013.

With the installed capacity of 250 thousand TEU per year, Assan Port offers services for "Container, General Cargo, Project Cargo and Dry Bulk Load Ships". In addition to the advantages provided Assan Port İskenderun for the companies in the Eastern Mediterranean and South-Eastern Anatolia and in the south of Central Anatolia regions due to its geographical position; and it is also the nearest container terminal opening to the west for the Northern Iraq.

With its specialized and experienced staff, Assan Port offers high-quality services to its customers in its port equipped also with a Ro-Ro ramp and subject to high-standard security controls on a 7-day/24-hour basis.
