Kibar Holding

Kibar Group initiated its activities in the areas of industry, service and commerce with the Flat Steel Service Center established in 1972. As one of Turkey's deeply - rooted corporate groups, Kibar Holding has been making significant contributions to the economy and the social welfare of the country.

Kibar Group operates in the metal, automotive, packaging, construction materials, real estate, logistics, energy, food, and service sectors and has more than 20 companies and 7,000 employees. The Group has developed a good reputation and a brand image thanks to its strong partnerships and its knowledge and experience about Turkey's market growth in its core businesses; it has also become a major force in contributing to the development of Turkey's economy. Kibar Group's international business partners include many leading companies in the world, such as Hyundai, THY, Posco, TIL, Seoyon E-Hwa, and Heritage.

Kibar Holding aims to coordinate the strategical functions of the units operating within its structure as well as to increase the value provided for its employees and shareholders through the guiding and supportive role it takes on in the society.

Kibar Holding and its subsidiaries generate value for Turkey's economy with their high production capacity, employment opportunities, exports, and investments.

Assan Alüminyum

Assan Alüminyum, one of the world's leading manufacturer in the flat-rolled aluminium (FRP) industry, has been producing coil & sheet, foil and pre-painted aluminium products since its establishment in 1988, offering its products to a variety of sectors such as packaging, distribution, construction, consumer durables, automotive and HVAC. Assan Alüminyum, a subsidiary of Kibar Holding, has an installed annual capacity reaching up to 300 thousand tons in its production facilities located in İstanbul and Kocaeli - Turkey. The company is currently the 3rd largest aluminium foil manufacturer in Europe, with an aluminium foil production capacity reaching up to 100 thousand tons.

Assan Alüminyum aims to Create the Future Together with its business partners. With its core values of reliability, flexibility and innovativeness, the company provides customized solutions for its customers. Assan Alüminyum's vision is based on being more environmentally sustainable. The renewable energy power plant and the in-house recycling facility both serve its sustainability strategy directly by reducing the company's carbon footprint.

With its global culture, almost 1,500 dedicated employees and its established and in progress international locations, Assan Alüminyum exports to more than 70 countries around the world, particularly to Western Europe and North America. Kibar Americas, the wholly-owned North American subsidiary of Assan Alüminyum,

established in Chicago, aims to perform the ambitious plans for growth and potential further investment in North America.

In addition, the negotiations are ongoing for new investments in the aluminium sector, which will allow for manufacturing high value-added products. With the increased employment and export, this investment will play an important role in the development of high-performance aluminium products required in strategic sectors such as defence, aviation, machinery, shipbuilding, automotive and flexible packaging.

Assan Gıda exports its products to more than 30 countries.

Assan Foods

Assan Foods was founded with the latest technologies in 1998 in Susurluk, an area near the Karacabey Plain where majority of the industrial tomatoes used in the production of tomato paste are grown. Assan Foods started its operations with tomato processing and tomato paste production. In 2000, ketchup production started and in 2002 mayonnaise and sauces were added to the company's portfolio. Today the Susurluk Factory manufactures more than 300 products, including high-quality tomato and red pepper paste, ketchup, mayonnaise, and various sauces.

The factory in Susurluk has one of the highest tomato processing capacities in Turkey. Established on an open area of 200,000 m², the factory consists of production, storage, management, and service buildings, along with social facilities, that make up a total area of 21,600 m². The industrial investment of Assan Foods, which has the capacity to process 4,500 tons of fresh tomatoes and produce 2.5 million products per day, is above 50 million dollars. More investments are underway.

Since its establishment, Assan Foods has exported to over 70 different countries and continues to export to more than

30 countries located in 4 continents. For years, the company has been operating in line with quality standards and has been regularly audited by certification bodies and customers. The company holds significant quality certifications, such as ISO 9001: 2008, BRC, IFS, and TSE.

Moreover, tomatoes used as raw material in the products of Assan Foods are grown with Good Agricultural Practices (GAP) and smart agriculture projects.

Assan Hanil conducts studies innovative projects in its R&D center.

Assan Hanil

Assan Hanil, one of Kibar Group's automotive companies was established in 1997 with the partnership of South Korean Seoyon E-Hwa, started production as an OEM Part Supplier in the automotive industry.

It became one of the important suppliers of Ford Otosan as of 2005 while it was supplying parts only for Hyundai Assan in the early years of its establishment. In addition to production of important parts of an M2 Light Commercial Vehicle (H350), which is a joint project between Karsan and Hyundai Motor Company (HMC), Assan Hanil has added Isuzu and Honda to its customer portfolio.

With over one thousand specialized employees working in its plants covering a total area of 80 thousand m² in three different locations; two in Kocaeli and one in Bursa, the company performs automation-based production activities with high technology.

Today, Assan Hanil is a supplier of driver and passenger seat as well as door panels, front and rear bumper, instrument panel, console, carpet, FEM Carrier, blow molding parts, glove box, various interior and exterior plastic components. Assan Hanil became one of 5 companies worldwide that design, develop and manufacture air suspension driver seat. Mass production of seat will start in July 2018.

Assan Hanil has been certified to the quality of its production with ISO 9001-2008, ISO/TS 16949, ISO 14001, ISO 27001, OHSAS 18001, Ford Q1 and Hyundai 4 Star Quality System Certificates. It conducts studies on innovative projects for weight reduction, cost optimization and quality enhancements in its R&D Center established in 2010. Assan Hanil has 37 intellectual property rights registered and another 23 in the application process.

TSI Aviation Seat, established in 2011 as a joint venture between Turkish Airlines (THY) and Assan Hanil, has been designing, producing, repairing and marketing all types of aircraft seats and supplying their spare parts.

Assan Panel capacity has reached to 18 million m²/year.

Assan Panel

The leader in the sandwich panel sector, **Assan Panel**, started production in 1990 at its first factory with a capacity of 4 million m²/year in Tuzla. The company invested in a 3 million m²/year facility in İskenderun in 2004, a 3 million m²/year facility in Balıkesir in 2009 and a 4.5 million m²/year facility in Jordan in 2012. In 2015, the company completed its investment in a second line at the 3.5 million m²/year capacity Tuzla İstanbul facility and reached a capacity of 18 million m²/year.

The Jordan facility of Assan Panel is installed on an indoor area of 6,500 m² and outdoor area of 10,000 m² with a fully automated production line equipped with the newest technology and is the largest sandwich panel producer in the Middle East with a capacity of 4.5 million m².

Assan Panel has added its galvanized sheet metal experience of its group since 1980 to its own structure to provide its customers with galvanized sheet metal products and services mostly for the construction and building sector. Products in the flat product group according to the needs of construction and building sector companies, are kept in stock for customer demand and presented to customers. Under the products groups that are the main items of galvanized and prepainted sheet metal are also roll, panel, grooved, blind and corrugated sheet products. Assan Panel, a leader in the sector by a wide margin ensures fire safety by using polyurethane, PIR (polyisocyanurate) and rock wool insulation materials in its sandwich panel products and contributes to the construction of safe

buildings. The company provides superior quality applicationservices with a good quality, safe and fire resistant product range and business partners, both domestic and international. Assan Panel, a company that has pioneered many firsts in the sector, earned an FM certificate in 2015 to become the only producer in Turkey with FM approval without height restriction on buildings. Guiding the sector with its quality approach, Assan Panel also holds certificates accepted worldwide like LPCB, UL GREENGUARD, GOST, SEPRO. By playing an active role in the global market and exporting to 42 countries, Assan Panel is on the fast track to becoming a global player in the sector.

Ege Assan

In 2010, Assan Gıda Sanayi ve Ticaret A.Ş. founded the company in the Aegean Free Zone with the aim of producing tomato paste for export and increasing competitive strength in global markets while also fulfilling customer needs and expectations.

The Ege Assan plant is established on an area of 4,500 m² and has the capacity to package 24,000 tons of tomato paste per year.

Tomato paste, the raw material of the products manufactured at the plant, is imported from California, the region which processes the most tomatoes in the world, and the paste is later re-processed and packaged in tin cans and glass packaging at the Izmir plant.

The products are exported to countries in North Africa, the Middle East, and the Arabian Peninsula, and sales activities aiming to established trade with other countries are successfully being carried out.

Hyundai Assan İzmit Factory has a maximum production capacity of 245 thousands of vehicles per year by 2017.

Hyundai Assan

Hyundai Assan, which celebrated its 20th anniversary in Turkey in 2017, is jointly managed by the Hyundai Motor Company and Kibar Group, which hold 70% and 30% of shares, respectively. As the compact automobile base of the brand with a total investment of 1.2 billion TRY, Hyundai Assan produces over 230,000 units of i10 and i20 models per year, which are exported to more than 40 countries, with the help of 2,800 employees. As one of the most popular automobile brands in Turkey, Hyundai Assan sells over 50,000 vehicles per year via 71 distributors around the country and exports mainly to Germany, the U.K., and Italy.

As the first overseas manufacturing facility of the Hyundai Motor Company, the Hyundai Assan İzmit Factory is located on an area of 1 million m² and has a maximum production capacity of 245,000 vehicles per year as of 2017. Manufacturing 36 units of the i10 and i20 models per hour, the factory controls each final product at 1,500 points before making deliveries. The Hyundai Assan Factory, which carries out assembly using first class production processes and holds ISO 9001 Quality Management

and ISO 14001 Environmental Management System certification, hosts a total of 213 advanced robots. With the help of a state of the art automation system and robots manufactured with the latest technology, one automobile is produced every 90 seconds at the factory in which digitalization through Industry 4.0 practices is prioritized.

Izmit Facilities is the largest flexible packaging investment whose construction has started in 2016. Made in Turkey on a single occasion.

Ispak Ambalaj

Ispak Ambalaj is a well-established and fast-growing Turkish packaging company. Building on more than 40 years of proven expertise and R&D, we offer integrated packaging production, from raw material sourcing and lacquering/lamination extrusion to printing/cutting and delivery of customized packaging products. The company's factory, which was established in Izmit and is equipped with Industry 4.0 technology, has tripled its production capacity to 40,000 tons per year.

We have particular expertise in flexible packaging and have the ability to produce applications for chocolate products, sugar and confectionary, dairy products, beverages, dried food and snacks, medical and pharmaceutical packaging, hygiene and pet food. We also design and supply tobacco and industrial packaging applications. As part of the Kibar Group, Ispak has direct access to aluminium foil production from Assan Alüminyum, one of the leading flat-rolled aluminium producers in Europe.

Ispak is proud to serve prominent Turkish and international companies. Together, we are continuously working with our customers to understand their needs and expectations. High-quality sustainable, cost effective, and easy to use packaging is at the core of our business.

TSI Uçak Koltuk Üretimi

TSI Uçak Koltuk Üretimi San. ve Tic. A.Ş. was established as a joint venture between Kibar Holding, Turkish Airlines, and Turkish Technic. TSI manufacture aviation seats with authorization from EASA and FAA, and the manufactured seats are used in A320, A330, B737 and B777 aircraft series. With authorization from TSI and PMA (Parts Manufacturing Authority), the company manufactures spare aviation seat parts and offers maintenance services with Part 145 certification. TSI Uçak Koltuk Üretimi A.Ş. has two production lines which are located in Istanbul and Utah and carries out design, engineering, manufacturing, and research and development activities internally.

As a result of the auditing by the EASA (European Aviation Safety Agency), the company obtained the ADOA (Alternative Procedures to Design Organisation Approval) in November of 2012 and the POA (Production Organization Approval) in December of 2013 and carries out manufacturing with authorization from the EASA and FAA (Federal Aviation Administration). The seats that TSI produces are used in the airplane models A320, A330, B737 and B777. As of the end of 2017, TSI has completed orders for 77 planes. TSI also has orders for 180 planes which will be delivered between 2018-2023. With a team consisting

of 85 employees, TSI carries out design, engineering, manufacturing, research and development activities at its new facility with an area of 1,000 m², which is located at Turkish Airlines' HABOM (Aviation Maintenance Repair-Overhaul Center) at the Istanbul Sabiha Gökçen International Airport. TSI SEATS Inc., which was founded by TSI for the American aviation industry, operates in Salt Lake City, Utah. TSI has a yearly seat production capacity of 10,000 pax, and has been certified by the FAA with the TSO certificate following audits.

Assan Yapı

Founded under the umbrella of Kibar Group in 2007, Assan Yapı operates in every area of the construction sector. Assan Yapı expands and improves each day by making use of the latest technological developments.

The projects that have been completed by Assan Yapı include Pendik - Kurtköy Houses, Asim Kibar Vocational and Technical High School, Tuzla Municipality Semiha Kibar Social Facilities, Tuzla Semiha Kibar Teacherage and Tuzla Municipality Waterfall Park.

Moreover, the renewal of its paint line facility and the construction of the Assan Aluminium Kocaeli Dilovası Factory and the Assan Hanil Production Facilities project, which are both investments by the Group, were carried out by Assan Yapı.

Assan Yapı acted as the contractor firm for the "İspak Packaging Factory" project, for which the foundations were laid in June of 2016 at the Asim Kibar Organized Industrial Zone in İzmit. The company is proud to have completed the project, which is one of the largest packaging factories in Europe, within 2016.

Assan Yapı, which has established a strong presence in the construction sector in a very short period of time thanks to its innovative and technological projects, along with its executive and technical staff, continues its operations with the same determination it had on day one.

Kibar Dış Ticaret

Kibar Dış Ticaret A.Ş. is the foreign trade company of Kibar Group, which is among Turkey's most prominent industrial institutions.

The company was founded in 1985 with the aim of playing a leading role in the country's foreign trade enterprise and to organize the foreign trade activities of Kibar Group as their expert company.

The company carries out the exports of both public and private enterprises that are prominent in Turkey, along with importing raw material for them. Moreover, the company carries out the trade of high tonnage products with the countries requested by its clients in various countries. The foreign trade volume of the company has experienced steady growth, reaching 1.5 million tons per year. With its international touch points and foreign trade know-how, Kibar Dış Ticaret represents the strong trade culture of the Group.

Kibar Foreign Trade was awarded the "Metallic Star of Export Award" in the category of "Aluminium Coil & Sheet and Foil" at the award ceremony organized by the Istanbul Ferrous and Nonferrous Metals Exporters Association (IMMIB).

According to 2017 figures released by the Uludağ Automotive Industry Exporters' Union (OİB), Kibar Foreign Trade has made it to the top 5 in the automotive industry, which has been the leading sector in Turkish exports for 12 successive years.

Kibar Foreign Trade ranked among the top 4 Export Champions in the Top 1000 Exporter Companies List announced by the Turkish Exporters Assembly in 2017.

Kibar Enerji

Kibar Enerji (Kibar Energy) was established in 2011 under the structure of Kibar Group to conduct importation and wholesale of natural gas in Turkish Energy Market. Kibar Enerji acquired 1 billion m³/year of natural gas purchase-sale contract under the West Line Contract transfer in 2012; and has become entitled to conduct importation and wholesale of natural gas as of 1 January 2013. Kibar Enerji aims at becoming one of the leading players of Turkish Energy Market which has become more liberalized with the gradually increasing participation of the private sector.

Kibar Enerji's main objectives are to contribute in the meeting of the country's natural gas needs by purchasing natural gas from domestic and/or foreign resources, to take a suitable role in the establishment of natural gas market in line with the best interests of the country, to conduct necessary activities for storage of natural gas, to make use of the opportunities that will create supply security and resource diversity in Turkish Energy Market, and to take necessary actions to realize new business and investment opportunities.

Kibar International

Established with a view to support export and import operations of Kibar Group companies, Kibar International conducts its activities in Lausanne, Switzerland, as a spot in the heart of Europe and close to financial circles. As required by its purpose of establishment, the company makes efforts for finding eligible suppliers for all overseas procurements including, particularly, raw material requirements, and for mediation in the exportation activities.

It provides significant advantages for the group by securing cost-effective financing in the sharp competitive environment in our globalizing world economy. Working in close collaboration with the leading banks and insurance companies of Europe, Kibar International also eliminates important risks by insuring trade receivables and provides assistance for ensuring compliance of the group companies' foreign trade operations with the international practices and norms.

Assan Lojistik

Assan Lojistik was founded in 1996 in order to provide from/to port transportation services. The company offers domestic transportation, bonded & non-bonded warehousing, out of gauge freight transportation and port services in Turkey, along with road, sea, air, railroad, intermodal, and project transportation services internationally.

As of 2017, the company has been offering services to Kibar Holding subsidiaries alongside prominent names in the sector with its 120 employees who are experts in their field, the Istanbul-Tuzla and Hatay-İskenderun plants, the Izmir and Mersin sales offices, a private truck fleet, and a large pool of suppliers.

Having initiated scheduled LCL & LTL transportation services to countries in the Western Mediterranean and North Africa, Assan Lojistik is planning to launch scheduled LCL & LTL transportation services to countries in West Africa, such as Senegal and Cameroon.

As of 2017, Assan Lojistik has adopted a process-based management approach in its organizational structure and will continue to invest in people and technology in the year 2018 by taking advantage of automation and digitalization opportunities.

Assan Port offers services with the installed capacity of 250 thousand TEU/year.

Assan Port

Assan Port was put into service by Assan Liman İşletmeleri A.Ş., one of Kibar Group companies in İskenderun Organized Industrial Zone in June 2010. Assan Port İskenderun, the first container terminal providing services for modern container ships at İskenderun Bay, has become the second and a very important alternative following Mersin for the same hinterland. The company continues its business activities with the partnership made with TIL (Terminal Investment Limited SA) by the end of 2013.

With the installed capacity of 250 thousand TEU per year, Assan Port offers services for "Container, General Cargo, Project Cargo and Dry Bulk Load Ships". In addition to the advantages provided Assan Port İskenderun for the companies in the Eastern Mediterranean and South-Eastern Anatolia and in the south of Central Anatolia regions due to its geographical position; and it is also the nearest container terminal opening to the west for the Northern Iraq.

With its specialized and experienced staff, Assan Port offers high-quality services to its customers in its port equipped also with a Ro-Ro ramp and subject to high-standard security controls on a 24/7 basis.
