Kibar Holding

Kibar Holding started its operations in the fields of industry, service, and trade with the Flat Steel Service Center, established in 1972. As one of the leading corporate groups in Turkey, it has been making significant contributions to the national economy and social welfare since its establishment.

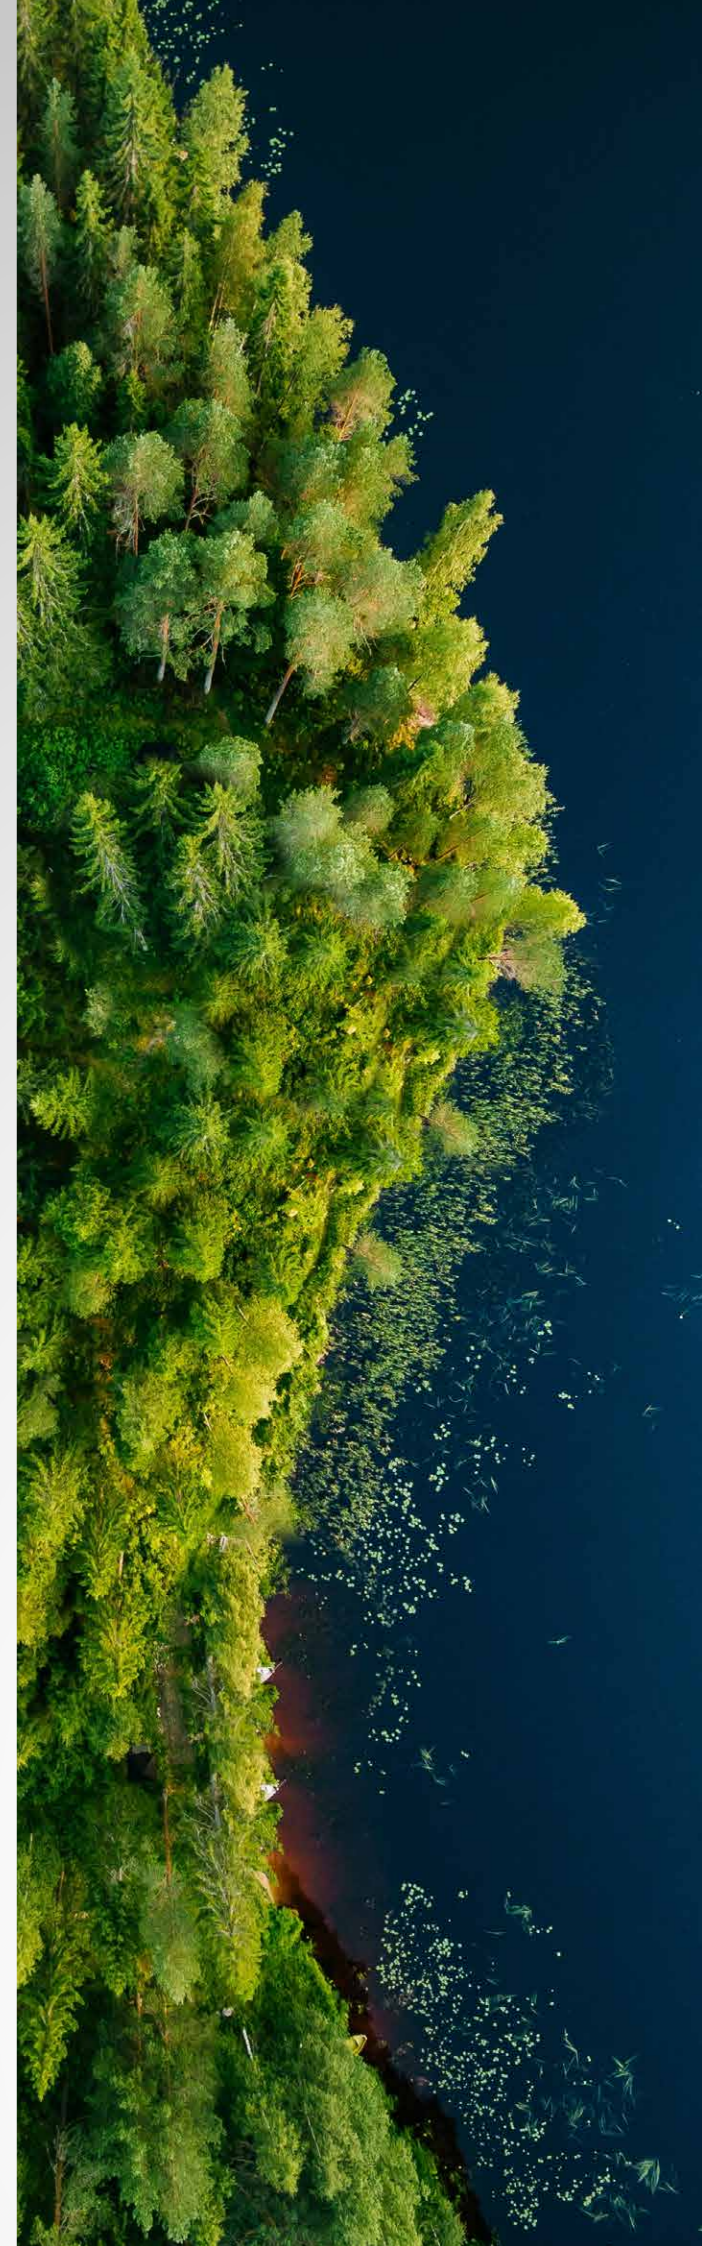

Kibar Group operates in the industries of metal, automotive, packaging, construction materials, real estate, logistics, energy, food, and service with its more than 20 companies and 7,000 employees.

Thanks to its reputation, brand image, strong partnerships, and knowledge and experience in Turkish markets, the group has grown in its main fields of activity and become a major force that contributes to the development of the economy. Kibar Group's international business partners include Hyundai, THY, Posco, TIL, Seoyon E-Hwa, and Heritage, which are the world's leading brands in their fields.

Kibar Holding aims to coordinate the strategical functions of the departments within the holding and increase the value it adds to its employees and stakeholders with its leading and supportive role in the community.

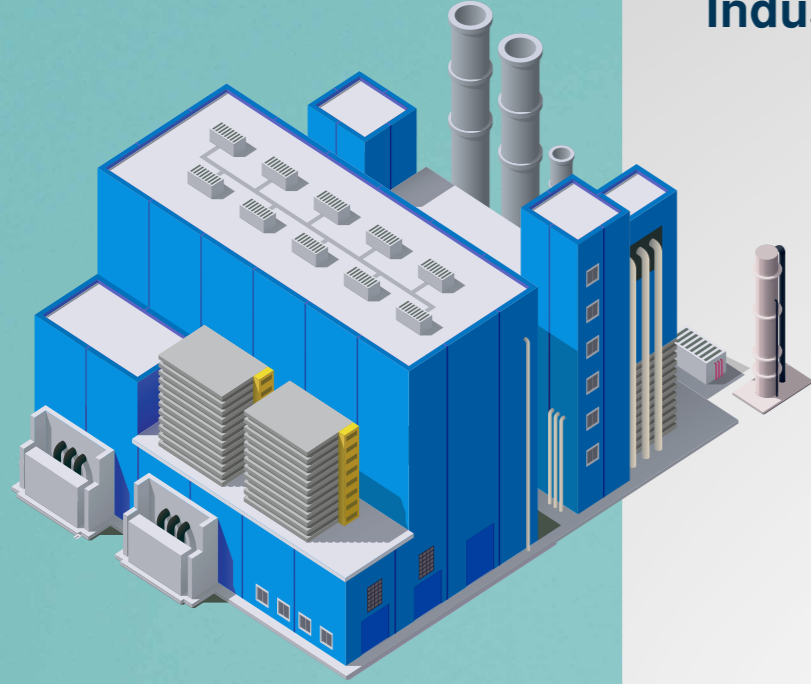

Kibar Holding and its subsidiaries add significant value to the Turkish economy with their high production capacities, employment opportunities, exports, and social investments.

We continue to work with our sustainable production approach in the field of **industry**.

According to the Istanbul Chamber of Industry, Assan Alüminyum **ranks 32nd among “Turkey’s Top 500 Industrial Enterprises”**.

Assan Alüminyum

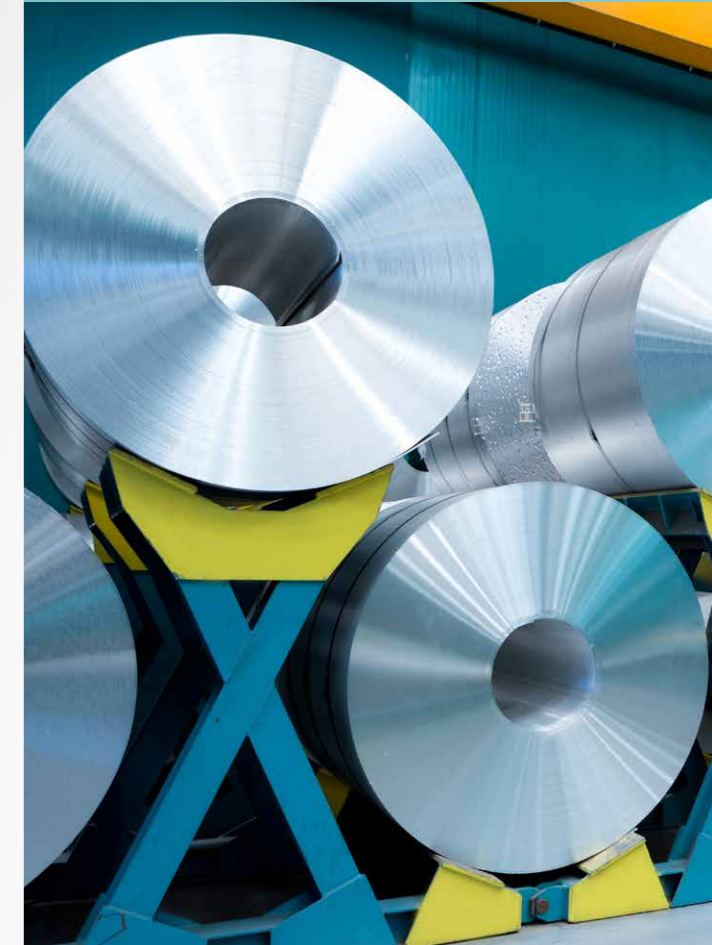

Assan Alüminyum, one of the world’s leading manufacturers in the flat-rolled aluminium (FRP) industry, has been producing coil & sheet, foil and pre-painted aluminium products since its establishment in 1988, offering its products to a variety of sectors such as packaging, distribution, construction, consumer durables, automotive and HVAC. Assan Alüminyum, a subsidiary of Kibar Holding, has an installed annual capacity of 300 thousand tons in its production facilities located in Istanbul and Kocaeli – Turkey. The company is currently one of the 3 largest aluminium foil manufacturers in Europe, with an aluminium foil production capacity reaching up to 100 thousand tons.

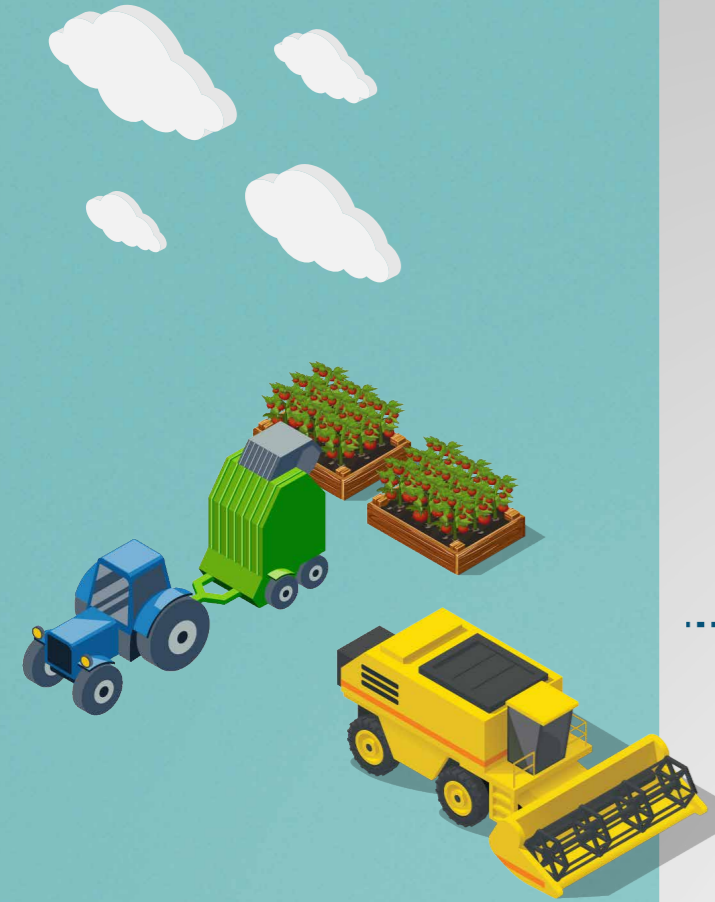

Assan Alüminyum aims to Create the Future Together with its business partners. With its core values of reliability, flexibility, innovation and sustainability, the company provides customized solutions for its customers. Assan Alüminyum’s vision is based on creating long-term value by being more environmentally sustainable, in environmental, governance and social terms. With its motto of “Creating the future without wasting it”, Assan Alüminyum constantly strives to reduce its carbon footprint, through producing clean energy at its renewable energy power plant, recycling inner and outer scrap at its in-house recycling facility and developing new energy efficiency projects every year to reduce its energy consumption per ton of production. Assan Alüminyum, a global pioneer in the continuous casting technology, creates value by developing innovative, tailor-made solutions for its business partners at its officially registered R&D Center.

With its global culture, 1500 dedicated employees and its established international locations, Assan Alüminyum exports to more than 70 countries around the world, particularly to West Europe and North America. Kibar Americas, the wholly-owned North American subsidiary of Assan Alüminyum, established in Chicago, aims to perform the ambitious plans for growth in North America.

In addition, the projects are ongoing for new investments in the aluminium sector, which will allow for manufacturing high value-added products. With the increased employment and export, this investment will play an important role in the development of high-performance aluminium products required in strategic sectors such as defence, aviation, machinery, shipbuilding, automotive and flexible packaging.

Assan Gıda exports its products to more than **30 countries.**

Assan Foods

Founded by Kibar Holding in 1998, Assan Foods started its operations with its modern infrastructure and high-tech machinery in Susurluk, located near the Karacabey Plain, the leading region for industrial tomatoes used for the production of tomato paste. Assan Foods entered the sector by processing tomatoes and producing tomato paste and added ketchup to its portfolio in 2000, mayonnaise and sauces in 2002.

Assan Foods manufactures more than 300 products, including high-quality tomato and pepper paste, ketchup, mayonnaise, and various sauces in its production facilities in Susurluk and the Aegean Free Zone.

The Susurluk Plant of Assan Foods has one of the highest tomato processing capacities in a single location in Turkey. Built on a land of 200,000 sq. meters, the plant's covered area is 21,600 sq. meters; including the production facility and the warehouse, as well as management and service buildings and social facilities. The factory has the capacity to process 4,500 tons of fresh tomatoes and manufacture more than 2.5 million products on a day. In addition to its industrial investment of over 57 million USD, new investments continue rapidly. Located in the Aegean Free Zone, the Ege Assan Plant covers an area of 4,500 sq. meters and has an annual tomato paste packaging capacity of 24,000 tons.

Assan Foods has exported to more than 70 different countries since its establishment. Its current exports markets expand to over 30 countries on 4 continents.

ASSANFOODS

Assan Foods has been producing tomato paste, ketchup, mayonnaise, and various sauces for customers in Europe and Asia for years, while also supplying global food companies around the world with tomato paste, pepper paste, and pepper juice as raw materials.

In Turkey, Assan Foods operates in the out-of-home consumption market with its own brands, Kingtom, Colorado, and Oba. While Kingtom offers tomato paste, ketchup, and mayonnaise, with a well-earned "the sauces expert of Turkey" position, Colorado is the leader of the category of sauces with its wide range of products, apart from its high-quality ketchup and mayonnaise. The products are delivered to many locations in Turkey through a wide network of distributors. Assan Foods also has many long-term customers for which it manufactures private label products in Turkey.

Hygiene standards are among the most uncompromising factors in each production phase. Since its establishment, Assan Foods has been carrying out activities by integrating the requirements of high quality standards with production processes and is being regularly audited by both certification bodies and its customers. Assan Foods maintains several industry-leading security and quality certifications, such as IFS, BRC, HALAL, BSCI, and TSE.

Implementing many projects for sustainable agriculture, Assan Foods collaborates with farmers and carefully conducts necessary inspections at all stages of tomato plantation and growth. As part of the Smart Farming Project, Assan Foods monitors the development of special tomato seedlings and collects important data through meteorology stations and sensors placed in the fields. The data offers guidance on field-soil selection and production processes for upcoming years as well.

Assan Hanil

Assan Hanil, one of Kibar Group's automotive companies was established in 1997 with the partnership of Seoyon E-Hwa which is the leading automotive supplier in South Korea, started production as an OEM Part Supplier in the automotive industry.

While Assan Hanil was supplying parts only for Hyundai Assan in the early years of its establishment, it has become one of the most important suppliers of Ford Otosan as of 2005. In the upcoming years, Assan Hanil has added Isuzu, Honda, AGCO, Mercedes-Benz Turkey and Turkey's Automobile Initiative Group (TOGG) to its customer portfolio respectively. In addition, Assan Hanil is one of the main suppliers for M2 Light Commercial Vehicle (H350), which is a joint project between Karsan and Hyundai Motor Company (HMC).

In 2019, Assan Hanil started-up Aksaray Plant for producing for Mercedes-Benz Turkey and Gölcük Plant for producing Ford Otosan. With over one thousand specialized employees working in its plants covering a total area of 175 thousand m² in five different locations; three in Kocaeli, one in Bursa and one in Aksaray; the company performs automation based production activities with high technology.

Today, Assan Hanil is a supplier of driver and passenger seat as well as door panels, front and rear bumper, instrument panel, console, carpet, FEM Carrier, blow molding parts, headlining, glove box, and various interior and exterior plastic components. Assan Hanil became one of the 5 companies worldwide which design, develop and manufacture air suspension driver seat

The production quality of Assan Hanil has been certified with ISO 9001-2015, ISO 14001, ISO/IEC 27001-2013, OHSAS 18001, IATF 16949-2016, Ford Q1, Hyundai 4-Star Quality System, and Daimler OSA Category-1 Certificates. Assan Hanil carries out innovative projects aiming for weight reduction, cost optimization and quality enhancements in its R&D Center established in 2010 and has 59 Industrial Property Rights registered and another 9 in the evaluation process.

TSI Aviation Seat, established in 2011 as a joint venture between Turkish Airlines (THY) and Assan Hanil, has been designing, producing, repairing and marketing all types of aircraft seats and supplying spare parts.

As the leading company in the sandwich panel industry, Assan Panel started production in 1990 at its first plant with an annual production capacity of 4 million sq. meters in Tuzla, Istanbul. Developing its capacity through continuous investments over the years, Assan Panel opened its İskenderun plant with an annual capacity of 3 million sq. meters in 2004, its Balıkesir plant with an annual capacity of 3 million sq meters in 2009, and its Jordan plant with an annual capacity of 4.5 million sq meters in 2012. In 2015, it successfully completed its investment in the second line of its Istanbul Tuzla Plant, which had an annual capacity of 3.5 million sq meters, and reached an annual production capacity of 18 million sq meters.

As the undisputed leader of its sector, Assan Panel contributes to the construction of sustainable and environmentally-friendly buildings with its polyurethane-filled panels; PIR- and rock wool-filled sandwich panel products that provide fire safety for cold rooms, roofs, and facades; panels ready for solar system installation; project-specific accessories; polycarbonate skylights; fasteners consisting of different types of screws; and construction chemicals consisting of sealants and fillers. It also provides superior installation service with its high-quality, reliable, innovative, and fire-resistant product range, and its business partners in Turkey and abroad.

Introducing many innovations into the sector, Assan Panel was awarded the FM certification in 2015. It is the leading manufacturer in Turkey with FM approval with no height restrictions, as well as many other international certifications. Playing an active role in the global market, Assan Panel exports to 76 countries with the brands it acquired such as AssanPU, Assan Demir, AssanWool, and Assan Board, and serves as a solution partner for industrial buildings.

Ege Assan

It was founded by Assan Gıda Sanayi ve Ticaret A.Ş. in the Aegean Free Zone in İzmir in 2010 in order to export tomato paste with the aim of increasing its competitiveness in global markets and meeting customer needs and expectations.

EgeAssan

The Ege Assan Plant covers an area of 4,500 sq meters and has an annual tomato paste packaging capacity of 24,000 tons. Tomato paste, which is the raw material of the products manufactured in the plant, is either supplied from Turkey or imported from the U.S. state of California, which is the world's leader in tomato processing. After the reprocessing in the production facilities in İzmir, the paste is mostly packaged in tin cans and glass containers.

The products are exported to North Africa, the Middle East, and the Arabian Peninsula. Sales operations to other countries are also carried out successfully.

As of 2017, Hyundai Assan has been standing out with its annual production capacity of **245,000 vehicles/annually**

Hyundai Assan

The Hyundai brand met Turkish consumers 30 years ago and is celebrating the 22nd anniversary of its production in Turkey this year. Jointly managed by Hyundai Motor Company and Kibar Holding, which hold respectively 70% and 30% of its shares, Hyundai Assan is the brand's compact automobile base that opens up to Europe. With a maximum annual production capacity of 245,000 vehicles, the Hyundai Assan İzmit Plant exports its i10 and i20 models manufactured by its more than 2,500 employees to over 40 countries. The countries to which the brand exports the most are Germany, the UK, and Italy. Hyundai Assan ranks among the 5 most loved brands in Turkey. Carrying out its sales and technical service operations continuously through its extensive dealer network across the country, the brand also offers a 5-year warranty option for its models.

Built on a land of a total of 1 million sq meters, the Hyundai Assan İzmit Plant was the first overseas production facility of Hyundai Motor Company. Manufacturing 36 units of i10 and i20 models per hour, the plant conducts a 1,500-point check on each vehicle before delivering them to their owners. Carrying out first-class production processes, the Hyundai Assan Plant has been awarded the ISO 9001 Quality Management and ISO 14001 Environmental Management System certifications. The plant also emphasizes digitalization processes and adopts Industry 4.0 practices.

The İzmit Plant, the construction of which began in 2016, **is the largest flexible packaging investment made on a single occasion in Turkey.**

İspak Ambalaj

As one of Turkey's longest-established flexible packaging manufacturers with over 45 years of expertise and experience, İspak Ambalaj aims for continuous development and growth. With its new facility, which was designed with an R&D Center according to Industry 4.0 predictions, it reached an annual installed capacity of 30,000 tons. Its Istanbul Tuzla and İzmit Plants offer integrated flexible packaging solutions needed by many industries such as food-dairy products, chocolate-confectionery, beverage, medical, and personal care with its production capability in printing, lacquering, lamination, extrusion, and slitting processes, where state-of-the-art technology and expertise are combined. In addition, it is the leading and key supplier in its industry with its tobacco and industrial products portfolio.

www.ispak.com

As a subsidiary of Kibar Holding, İspak Ambalaj aims to reach an annual production capacity of 30,000 tons by achieving a high production rate with the largest flexible packaging investment made on a single occasion in Turkey. İspak Ambalaj, which will become one of the industry leaders in Europe with its new plant, aims to carry out high-value-added operations by emphasizing its efficiency and effectiveness more.

The new production facility in the İzmit Asım Kibar Organized Industrial Zone is an important investment for the future of the packaging industry. The new facility was designed according to Industry 4.0 predictions and equipped with an automated storage system, hygienic production areas, solvent recovery system, and state-of-the-art technology. With the facility, the R&D Center has also become operational.

The carbon footprint has been minimized with the solvent recovery system in the new facility, which was designed with environmental sensitivity.

İspak proudly serves many large Turkish and international companies. It constantly cooperates with its customers to meet their needs and expectations. Producing high-quality, sustainable, cost-efficient, and easy-to-use packaging is always at the core of its business.

Kibar Enerji

As one of the private natural gas importers in Turkey, Kibar Enerji A.Ş. entered to energy sector by signing 1 bcm/year natural gas import contract with Russian natural gas company Gazprom in 2012. Kibar Enerji has entitled to import and wholesale natural gas in Turkey by gaining a natural gas import license from EMRA in 2013. Kibar Enerji aims to be one of the leading players in the Turkish Energy Market, where the role of private sector becomes essential with the liberalization of the market.

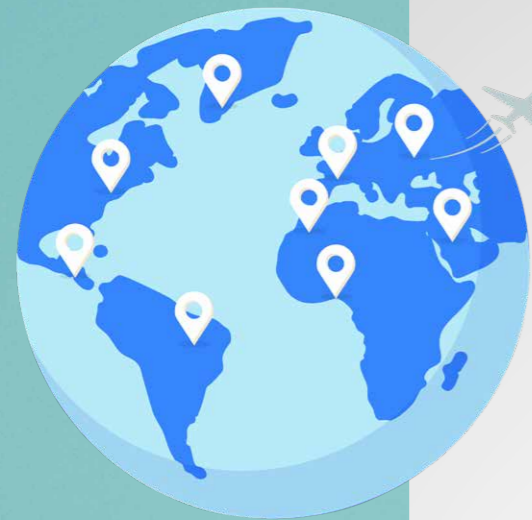

KİBAR ENERJİ

In addition to international companies which are active in Turkish Energy Market and other wholesale companies, Kibar Enerji sells natural gas also to power stations, industrial zones and eligible industry consumers. On the other hand, Kibar Enerji has gained an electricity supply license from EMRA in 2015.

Its main purposes are to contribute to the natural gas supply security of the country by purchasing natural gas from Turkey and abroad and operating necessary activities for natural gas storage; to play an appreciative and beneficial role in the establishment of the natural gas market in the country; to take advantage of the opportunities that will provide supply security and resource diversity in the Turkish Energy Market; and to take the necessary actions to take advantage of new business and investment opportunities.

Kibar International

Established with a view to support import and export operations of Kibar Group companies as well as trading operations, Kibar International conducts its activities in Lausanne, Switzerland, as a spot in the heart of Europe and close to financial institutions. As required by its purpose of establishment, the company makes efforts in finding eligible suppliers for all overseas procurements including but not limited to, raw material requirements as well as mediation for the export activities.

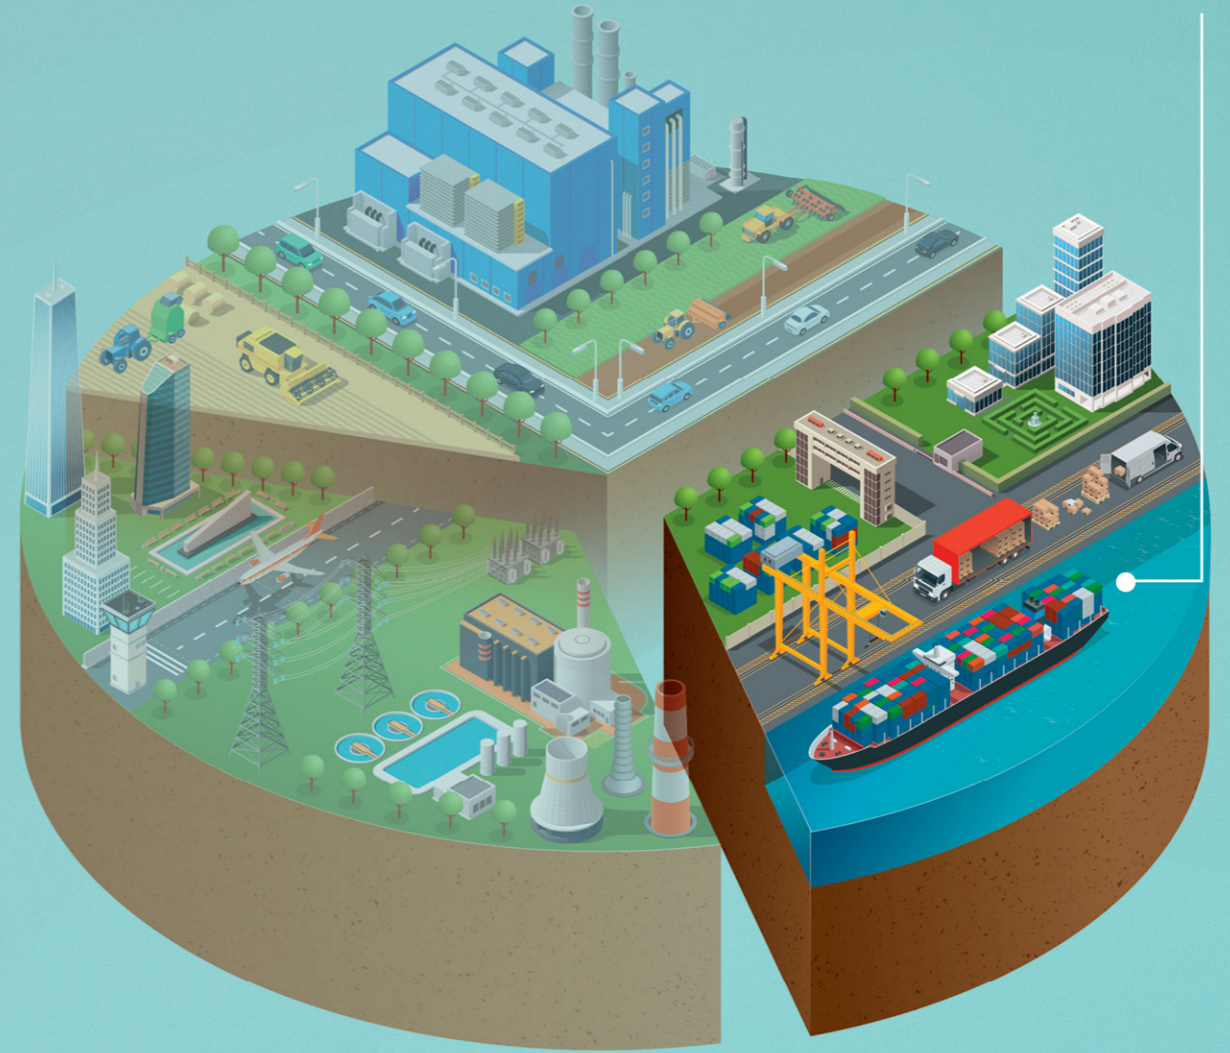

It provides significant advantages for the group by securing all trades in close collaboration with leading financing institutions and insurances in Switzerland, Europe and United Kingdom. Kibar International also eliminates important risks by insuring trade receivables and provides assistance for ensuring compliance of group companies' foreign activities in line with international regulations and practices.

Assan Lojistik

It was founded in 1996 to offer port-connected transportation services. Assan Lojistik offers domestic transportation, warehousing, storing, out-of-gauge load transportation, and port services across Turkey. It also carries out intermodal, road, maritime, air, and project transportation operations in the international arena.

In 2017, Assan Lojistik started to offer scheduled partial transportation service to Western Mediterranean and North African countries. It aims to make progress on the route of the One Belt One Road (OBOR) project with the African market in 2019.

 **AssanLojistik**

As of 2019, it serves not only Kibar Holding affiliates, but also the reference names of different industries with its 110 competent employees; its facilities in Tuzla, Istanbul, and İskenderun, Hatay; its Mersin sales office; its self-owned semi-trailer truck fleet; and its large supplier pool.

Adopting a process-based management style in its organizational structure, Assan Lojistik continues to invest in Human Resources and Technology by taking advantage of automation and digitalization opportunities.

Assan Port

Assan Port was put into service by Assan Liman İşletmeleri A.Ş., one of Kibar Group's subsidiaries, in the İskenderun Industrial Zone in June 2010. As the first container terminal serving modern container ships in the Gulf of İskenderun, Assan Port İskenderun has become the second and a very important alternative for the same hinterland, following Mersin. It has been carrying out its business activities in partnership with Terminal Investment Limited SA (TIL) as of the end of 2013.

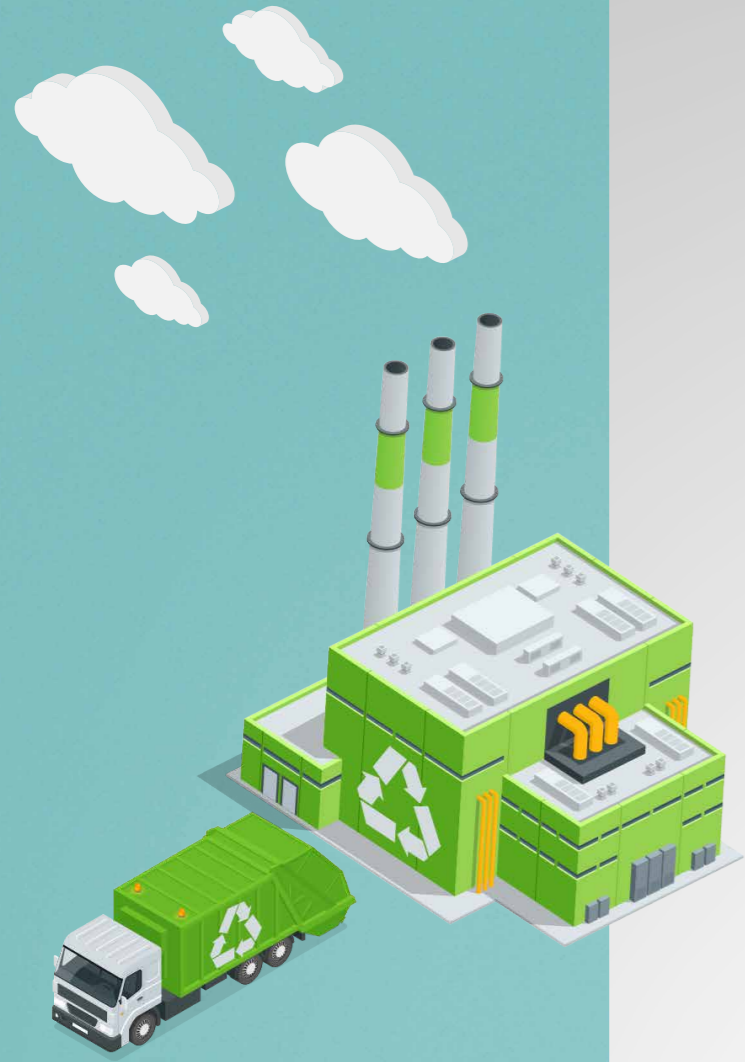

AssanPort

Having an annual installed capacity of 250,000 TEU, Assan Port serves "container ships, general cargo ships, project cargo ships, and dry bulk carriers". In addition to providing advantages for companies in the Eastern Mediterranean, the Southeastern Anatolia Region, and the south of the Central Anatolia Region with its geographical location, Assan Port İskenderun is the closest container terminal for Northern Iraq to open up to the west.

A Ro-Ro ramp is also available in the port, which conducts 24/7 high-quality security checks. The port offers high-quality service to its customers with its expert and experienced staff.

İnteraktif Çevre Danışmanlık

İnteraktif Çevre was established in December 2015 as a joint venture between Kibar Group and The Heritage Group, which has been operating in the USA since 1930, to offer competitive and innovative solutions in the fields of total waste management, zero waste consultancy, and environmental consultancy. It started to operate actively in June 2016. The effective role of Kibar Holding in the Turkish industrial sector and its wide business network were combined under a corporate roof with the innovative solutions of Heritage and its experience in total waste management.

İnteraktif Çevre provides comprehensive total waste management consultancy to industrial facilities, offers competitive solutions in this field, and supports its customers in obtaining added value from waste. Enabling its customers to report their waste online 24/7 with its extensive data management solutions, İnteraktif Çevre acts as the solution partner of its customers in the field of sustainability and offers solutions to minimize the risks in this field and to ensure reliable and sustainable growth in environmental services despite the ongoing difficulties.

In line with its zero waste approach, which complies with the sustainable development targets, İnteraktif Çevre offers international standards to its customers not only in its total waste management and environmental consultancy services, but also in comprehensive training modules and inspection services in industrial plants and service points such as hotels, shopping malls, schools, and health institutions.
