## Kibar Holding

Kibar Group initiated its activities in the areas of industry, service and commerce with the Flat Steel Service Center established in 1972. As one of Turkey's deeply - rooted corporate groups, Kibar Holding has been making significant contributions to the economy and the social welfare of the country.

Kibar Group operates in the metal, automotive, packaging, construction materials, real estate, logistics, energy, food, and service sectors and has more than 20 companies and 7,000 employees. The Group has developed a good reputation and a brand image thanks to its strong partnerships and its knowledge and experience about Turkey's market growth in its core businesses; it has also become a major force in contributing to the development of Turkey's economy. Kibar Group's international business partners include many leading companies in the world, such as Hyundai, THY, Posco, TIL, Seoyon E-Hwa, and Heritage.

Kibar Holding aims to coordinate the strategical functions of the units operating within its structure as well as to increase the value provided for its employees and shareholders through the guiding and supportive role it takes on in the society.

Kibar Holding and its subsidiaries generate value for Turkey's economy with their high production capacity, employment opportunities, exports, and investments.

We strive to add  
value to our industries

## Assan Alüminyum

**Assan Alüminyum**, one of the world's leading manufacturer in the flat-rolled aluminium (FRP) industry, has been producing coil & sheet, foil and pre-painted aluminium products since its establishment in 1988, offering its products to a variety of sectors such as packaging, distribution, construction, consumer durables, automotive and HVAC. Assan Alüminyum, a subsidiary of **Kibar Holding**, has an installed annual capacity of **300 thousand tons** in its production facilities located in Istanbul and Kocaeli - Turkey. The company is currently one of the **3 largest aluminium foil manufacturers in Europe**, with an aluminium foil production capacity reaching up to 100 thousand tons.

Assan Alüminyum aims to **Create the Future Together** with its business partners. With its core values of **reliability, flexibility** and **innovativeness**, the company provides customized solutions for its customers. Assan Alüminyum's vision is based on being more environmentally sustainable. The renewable energy power plant and the in-house recycling facility both serve its sustainability strategy directly by reducing the company's carbon footprint.

With its global culture, 1500 dedicated employees and its established international locations, Assan Alüminyum exports to more than 70 countries around the world, particularly to West Europe and North America. **Kibar Americas**, the wholly-owned North American subsidiary of Assan Alüminyum, established in Chicago, aims to perform the ambitious plans for growth in North America.

In addition, the projects are ongoing for new investments in the aluminium sector, which will allow for manufacturing high value-added products. With the increased employment and export, this investment will play an important role in the development of high-performance aluminium products required in strategic sectors such as defence, aviation, machinery, shipbuilding, automotive and flexible packaging.

info@assanfoods.com  
www.assanfoods.com

Founded by Kibar Holding in 1998, Assan Foods started processing commercial tomatoes for raw and packaged tomato paste with its modern and high technology plant in Susurluk, an area near the Karacabey Plain where commercial tomatoes are heavily cultivated. In 2000, the facility commenced ketchup production and 2 years later, mayonnaise and sauces were added to the product portfolio. In 2010, a repackaging facility was established in Aegean Free Zone to serve the tomato paste demands of the export countries.

Assan Foods plants in Susurluk and the Aegean Free Zone produce over 300 products, including high quality tomato and pepper paste, ketchup, mayonnaise, and various sauces.

The factory in Susurluk has one of the highest tomato processing capacities in Turkey. It is established on an open area of 200,000 m<sup>2</sup>, consists of production, warehouse, management, and service buildings, along with social facilities, which make up a total area of 21,600 m<sup>2</sup>.

The plant has the capacity to process 4,500 tons of fresh tomatoes and produce more than 2.5 million products per day. The company's industrial investments amount to more than 50 million USD, and additional investments are underway. The Ege Assan plant located in the Izmir Aegean Free Zone is established on an area of 4,500 m<sup>2</sup> and has the capacity to package 24,000 tons of tomato paste per year.

Since it was established, Assan Foods has exported to over 70 different countries and continues to export to more than 30 countries located in 4 continents.

The company produces tomato paste for many countries in the Caucasus, Middle East, and Africa, and has been producing ketchup and sauces for retailers in Europe and Asia Pacific for several years.

Moreover, it also supplies tomato paste, pepper paste and pepper juice as raw material to multinational food companies around the world.

In Turkey, Assan Foods operates in the out-of-home consumption market with its brands Kingtom, Colorado, and Oba. While Kingtom serves the out-of-home consumption market in the areas of paste, ketchup, and mayonnaise, Colorado is the leader in the area of sauces in the same market. The products under these brands are delivered to various locations across Turkey through a wide network of distributors. Assan Foods has also been producing private label products for a lot of Turkish customers in out-of-home and retail channels.

Since its founding, Assan Foods has been carrying out activities by integrating the requirements of high quality standards with production processes and has been regularly audited by certification bodies and customers. Moreover, the company holds significant security and quality certifications, such as ISO 9001:2008, BRC, IFS, and TSE.

Assan Foods ensures tomato production of its contracted farmers are in compliance with Good Agricultural Practices (GAP), which the United Nations defines as "practices that aim to make the agricultural production system socially responsible, economically viable, efficient, protective of human health and sustainability, and environmentally sound to ensure animal welfare."

Moreover under the Smart Farming Project, Assan Foods monitors the development of tomato seedlings and collects important data through meteorology stations and sensors placed in the fields of the Karacabey Plain. The data offers guidance on field-soil selection and production processes for upcoming years.

## Assan Hanil

Assan Hanil, one of Kibar Group's automotive companies was established in 1997 with the partnership of Seoyon E-Hwa which is the leading automotive supplier in South Korea, started production as an OEM Part Supplier in the automotive industry.

It became one of the important suppliers of Ford-Otosan as of 2005 while it was supplying parts only for Hyundai Assan in the early years of its establishment. In the upcoming years, Assan Hanil has added Isuzu, Honda, Agco and Mercedes Benz Turkey to its customer portfolio respectively. In addition Assan Hanil is one of the main suppliers for M2 Light Commercial Vehicle (H350), which is a joint project between Karsan and Hyundai Motor Company (HMC).

With over one thousand specialized employees working in its plants covering a total area of 89 thousand m<sup>2</sup> in four different locations; two in Kocaeli, one in Bursa and one in Aksaray, the company performs automation-based production activities with high technology. Aksaray plant started production for Mercedes Benz Turkey in 2019 as 4<sup>th</sup> location in Turkey.

Today, Assan Hanil is a supplier of driver and passenger seat as well as door panels, front and rear bumper, instrument panel, console, carpet, FEM Carrier, blow molding parts, headlining, glove box, and various interior and exterior plastic components. Assan Hanil became one of 5 companies worldwide which design, develop and manufacture air suspension driver seat.

Assan Hanil has been certified to the quality of its production with ISO 9001, IATF 16949, ISO 14001, ISO 27001, OHSAS 18001, Ford Q1, Hyundai 4 Star and Daimler Category 1 Quality System Certificates.

It conducts studies on innovative projects for weight reduction, cost optimization and quality enhancements in its R&D Center established in 2010. Assan Hanil has 43 Industrial Property Rights registered and another 7 in the application process.

TSI Aviation Seat which is the subsidiary company of Assan Hanil, established in 2011 as a joint venture with Turkish Airlines (THY) has been designing, producing, repairing and marketing all types of aircraft seats and supplying spare parts.

The leading company in the sandwich panel industry, Assan Panel initiated production in 1990 at its first factory in Tuzla, Istanbul with a capacity of 4 million m<sup>2</sup>/year.

Continuing the investments to improve its capacity over the years, Assan Panel carried out investments for the İskenderun facility with a capacity of 3 million m<sup>2</sup>/year in 2004, for the Balıkesir facility with a capacity of 3 million m<sup>2</sup>/year in 2009, and for the Jordan facility with a capacity of 4.5 million m<sup>2</sup>/year in 2012. Then, in 2015, the investment for the second line of the Tuzla facility, which previously had a capacity of 3.5 million m<sup>2</sup>/year, was completed and the capacity was increased to 18 million m<sup>2</sup>/year.

The leader in the sandwich panel sector, Assan Panel contributes to the construction of environment friendly and sustainable buildings with its polyurethane-filled sandwich panels, PIR (Polyisocyanurate) and stonewool filled sandwich panels that provide high fire safety in roof, wall and cold store sandwich panel models. Assan Panel also has sandwich panels ready for solar system installation, accessories produced specific to projects, polycarbonate lighting panels, fixing screws, sealing and bonding products.

In addition to its high-quality, safe and fireproof product range, Assan Panel has many international certificates and FM certificate. The company also provides top quality EPC services together with its local and global business partners. Exporting to 67 countries in the world, Assan Panel is on the way to become a top player on global market soon.

## Ege Assan

The company was founded in 2010 by Assan Foods in the Aegean Free Zone located in Izmir in order to increase competitive capacity in global markets and to fulfill the needs and expectations of export customers.

Tomato paste, which is the raw material of the goods packaged in the facilities, is either procured from local producers or imported from California, USA, the region which is the leading commercial tomato processor in the world.

After they are reprocessed in the Izmir facility, they are packaged in tin cans or glass containers. Products of Ege Assan are exported to countries in North Africa, the Middle East and the Arabic Peninsula. Sales to other countries are also carried out successfully.

Hyundai Assan, which entered the Turkish market 30 years ago, is celebrating its 22<sup>nd</sup> production year in Turkey today. Jointly managed by the Hyundai Motor Company and Kibar Group, which hold 70% and 30% of shares, respectively, Hyundai Assan is the brand's compact automobile hub that opens up to Europe. Hyundai Assan İzmit Factory, which has an annual maximum production capacity of 245,000 products, manufactures i10 and i20 models with more than 2,500 employees and exports them to more than 45 countries. Carrying out the highest export to Germany, England, and Italy, Hyundai Assan ranks among the top five brands in Turkey. Providing sales and services continuously through its nationwide dealer network, the brand also offers a 7-Year Guarantee option in its models.

Located on an area of 1 million sqm, the Hyundai Assan İzmit Factory is the first overseas manufacturing facility of the Hyundai Motor Company. Manufacturing 36 units of i10 and i20 models per hour, the factory controls each final product at 1,500 points before making deliveries. The Hyundai Assan

Factory, which carries out assembly using first-class production processes and holds ISO 9001 Quality Management and ISO 14001 Environmental Management System certifications, also attaches great importance to the digitization processes with Industry 4.0.

Izmit Facilities is the largest flexible packaging investment whose construction has started in 2016. Made in Turkey on a single occasion.

Having been established as a subsidiary of Kibar Holding in 1974, İspak Ambalaj is a fast-growing packaging company: Building on over 40 years of proven expertise and R&D, the company carries out various activities, including integrated packaging production, raw material sourcing, lacquering/ lamination extrusion, printing/cutting and delivery of customized packaging products. With its new factory equipped with the latest technology in the Asım Kibar Organized Industrial Zone located in İzmit, İspak Ambalaj has tripled its production capacity to 30,000 tons/year. İspak Ambalaj has particular expertise in flexible packaging and has the ability to provide various production alternatives for chocolate products, sugar and confectionary, dairy products, beverages, dried food and snacks, medical and pharmaceutical packaging, hygiene products and pet food. The company also designs and supplies tobacco and industrial packaging applications. İspak Ambalaj has direct access to aluminium foil produced by Assan Alüminyum, one of the leading flat-rolled aluminium producers in Europe.

Designed in line with Industry 4.0 projections, İspak Ambalaj's new factory carried out Turkey's single largest flexible packaging investment. The new plant worth nearly 200 million TRY uses automatic production systems, simulations, horizontal and vertical software integration, cyber security and cloud technologies. A solvent recovery plant has been established at İspak Ambalaj's new environmentally friendly factory. Our carbon footprint will be minimized thanks to the facility that will recycle 5,000 tons of solvents per year.

İspak Ambalaj's facilities, which implement ISO 9001, ISO 22000, BRC IoP (Global Standard for Packaging and Packaging Materials), OHSAS 18001, ISO 14001 and ISO 27001, have been awarded the Award for Excellence in Consistent TPM Commitment, the second phase of the TPM Awards.

Developing unique packaging solutions to meet customer needs and expectations, İspak Ambalaj was awarded the 2017 World Packaging Organisation (WPO) WorldStar Award, the 2017 AsiaStar Award and the 2017 Crescents and Stars for Packaging Award. As a member of several leading national and international sector-related organizations, İspak Ambalaj is renowned for its high standards.

Providing services to numerous large Turkish and international companies and continuously cooperating with its customers, İspak Ambalaj places high quality, sustainable, cost effective, easy to use packaging which is in line with customer needs and expectations at the core of its business.

TSI Uçak Koltuk Üretimi San. ve Tic. A.Ş. was established as a joint venture between Kibar Holding, Turkish Airlines, and Turkish Technic. Authorized by the EASA and FAA, TSI manufactures airplane seats for the A320, A330, A350, B737, B777, and B787 models. TSI also produces spare parts for airplane seats with the authorization granted by the PMA (Parts Manufacturing Authority) and provides maintenance services with the Part 145 certificate. TSI Uçak Koltuk Üretimi San. ve Tic. A.Ş. has two production lines, which are located in Istanbul and Utah, and carries out design, engineering, manufacturing, and research and development activities internally.

As a result of the auditing conducted by the EASA (European Aviation Safety Agency), the company obtained the ADOA (Alternative Procedures to Design Organization Approval) in November of 2012 and the POA (Production Organization Approval) in December of 2013. The production is carried out with the authorization of the EASA and FAA (Federal Aviation Administration).

With a team consisting of 110 employees, TSI carries out design, engineering, manufacturing, research and development

activities at its new facility with an area of 3,400 m<sup>2</sup> and an annual seat production capacity of 25,000 pax, which is located at Istanbul Sabiha Gökçen International Airport. TSI SEATS Inc., which was founded by TSI for the American aviation industry, operates in Salt Lake City, Utah. TSI has completed a total of 93 plane orders as of the end of 2018, and it has orders for more than 300 planes to be delivered between 2019 and 2023.

## Assan Yapı

Founded under the umbrella of Kibar Group in 2007, Assan Yapı operates in every area of the construction sector. Assan Yapı expands and improves each day by making use of the latest technological developments.

The projects that have been completed by Assan Yapı include Pendik - Kurtköy Houses, Asım Kibar Vocational and Technical High School, Tuzla Municipality Semiha Kibar Social Facilities, Tuzla Semiha Kibar Teacherage and Tuzla Municipality Waterfall Park.

Moreover, the renewal of its paint line facility and the construction of the Assan Aluminium Kocaeli Dilovası Factory and the Assan Hanil Production Facilities project, which are both investments by the Group, were carried out by Assan Yapı.

Assan Yapı acted as the contractor firm for the "İspak Packaging Factory" project, for which the foundations were laid in June of 2016 at the Asım Kibar Organized Industrial Zone in İzmit. The company is proud to have completed the project, which is one of the largest packaging factories in Europe, within 2016.

Assan Yapı, which has established a strong presence in the construction sector in a very short period of time thanks to its innovative and technological projects, along with its executive and technical staff, continues its operations with the same determination it had on day one.

Kibar Dış Ticaret is the foreign trade company of Kibar Group, one of Turkey's leading industrial companies.

It was established in 1985 to play a leading role in the foreign trade initiatives started in the country and to organize the foreign trade activities of the Kibar Group as an expert company in this field.

Today, it carries out the export activities of many leading companies in Turkey and meets their raw material needs. In addition, it is engaged in high tonnage transit trade from foreign countries to third countries. The foreign trade volume of the company has progressed steadily and has reached 1.5 million tons per year. Kibar Dış Ticaret is a distinctive representative of the strong commercial culture of the group with its widespread contact points and foreign trade expertise.

Kibar Dış Ticaret ranks among the top companies in the list of Turkey's Top 1000 Exporting Companies announced by the Turkish Exporters Assembly (TIM) every year.

Contract transfer.

## Kibar Enerji

Kibar Enerji (Kibar Energy) was established in 2011 under the structure of Kibar Group to conduct importation and wholesale of natural gas in Turkish Energy Market. Kibar Enerji acquired 1 billion m<sup>3</sup>/year of natural gas purchase-sale contract under the West Line Contract transfer in 2012; and has become entitled to conduct importation and wholesale of natural gas as of 1 January 2013. Kibar Enerji aims at becoming one of the leading players of Turkish Energy Market which has become more liberalized with the gradually increasing participation of the private sector.

Kibar Enerji's main objectives are to contribute in the meeting of the country's natural gas needs by purchasing natural gas from domestic and/or foreign resources, to take a suitable role in the establishment of natural gas market in line with the best interests of the country, to conduct necessary activities for storage of natural gas, to make use of the opportunities that will create supply security and resource diversity in Turkish Energy Market, and to take necessary actions to realize new business and investment opportunities.

## Kibar International

Established with a view to support export and import operations of Kibar Group companies, Kibar International conducts its activities in Lausanne, Switzerland, as a spot in the heart of Europe and close to financial circles. As required by its purpose of establishment, the company makes efforts for finding eligible suppliers for all overseas procurements including, particularly, raw material requirements, and for mediation in the exportation activities.

It provides significant advantages for the group by securing cost-effective financing in the sharp competitive environment in our globalizing world economy. Working in close collaboration with the leading banks and insurance companies of Europe, Kibar International also eliminates important risks by insuring trade receivables and provides assistance for ensuring compliance of the group companies' foreign trade operations with the international practices and norms.

It is our job to always aim for the better in the service sector

info@assanlojistik.com.tr  
www.assanlojistik.com.tr

Assan Lojistik was founded in 1996 with the aim of providing port-connected transportation services. Providing domestic transportation, bonded warehousing, storage, out of gauge cargo transportation and port services in Turkey, Assan Lojistik carries out intermodal, road, sea, air and project transportation operations internationally.

As of 2017, Assan Lojistik started the scheduled partial transportation service to West Mediterranean and North African countries. It aims to achieve progress on the One Belt One Road (OBOR) project with the African market in 2019.

As of 2019, Assan Lojistik provides services for prominent names in its sectors together with Kibar Holding subsidiaries with 110 competent employees, the Istanbul-Tuzla and Hatay-İskenderun facilities, the Mersin sales office, a self-owned fleet, and a wide range of suppliers.

Adopting process-based management in the organizational structure, Assan Lojistik utilizes the opportunities for automation and digitalization and continues to invest in Human Resources and Technology.

Assan Port offers services with the installed capacity of 250 thousand TEU/year.

Assan Port was put into service by Assan Liman İşletmeleri A.Ş., one of Kibar Group companies in İskenderun Organized Industrial Zone in June 2010. Assan Port İskenderun, the first container terminal providing services for modern container ships at İskenderun Bay, has become the second and a very important alternative following Mersin for the same hinterland. The company continues its business activities with the partnership made with TIL (Terminal Investment Limited SA) by the end of 2013.

With the installed capacity of 250 thousand TEU per year, Assan Port offers services for "Container, General Cargo, Project Cargo and Dry Bulk Load Ships". In addition to the advantages provided Assan Port İskenderun for the companies in the Eastern Mediterranean and South-Eastern Anatolia and in the south of Central Anatolia regions due to its geographical position; and it is also the nearest container terminal opening to the west for the Northern Iraq.

With its specialized and experienced staff, Assan Port offers high-quality services to its customers in its port equipped also with a Ro-Ro ramp and subject to high-standard security controls on a 24/7 basis.
